

can't find downloaded zip file on android

Can't find downloaded zip file on android.

Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

How to Open a ZIP File on an Android Phone or Tablet.

Opening ZIP files is something people associate with computers, but it can be done on a phone or tablet too. If you download a compressed file on your Android device, it's not too difficult to extract its contents. We'll show you how.

Every Android phone comes with a file manager app, but they're typically barebones and can't open ZIP files. Thankfully, there are a number of apps on the Google Play Store that can do it for free.

One app that we like is "Files by Google." Not only is this a good app for uncompressing ZIPs, but it's also a good all-around file manager that can also be used to free up space on your smartphone.

First, download Files by Google from the Google Play Store on your Android device. Next, open the app and locate the ZIP file you would like to open. If you downloaded the compressed file, look for a "Downloads" folder.

From there, select the file to bring up the Extracting dialog. Tap the "Extract" button to open the file.

You'll see a progress bar and then the dialog will tell you the file has been unzipped. Tap "Done" to finish. If you'd like to discard the ZIP file, you can check the "Delete ZIP File" box while closing the pop-up menu.

That's it! The extracted contents from the ZIP file will be placed in the same folder location as the ZIP file itself.

How to Download a Zip File on Google Photos on Android.

This article was written by Nicole Levine, MFA. Nicole Levine is a Technology Writer and Editor for wikiHow. She has more than 20 years of experience creating technical documentation and leading support teams at major web hosting and software companies.
