

**five nights at minecraft download**

Five nights at Minecraft APK.

Five nights at minecraft is inspired by Five Nights game, but in this map you will be in a factory trying to survive through night. But is not going to be easy because there are alive hostile minecraft animatronics roaming the factory. It's considered a survival mcpe map with some horror elements. At this point there doesn't seem to be much other functionalities in terms of the items and so on. During the night the animatronics come to life and it's your job to stop them.

Press the rules button and then the Play button to start a game. You'll be equipped with a flashlight and camera. It's just too bad that neither of the items appear to give any advantages in the actual game play. The main objective is to survive the night and avoid the animatronics.

Flashlight – Night vision Camera – Decorative item meant to make the game more realistic and scarier Guard's Hat – Optional, doesn't do anything Animatronics – Hostile monsters.

The models for the animatronics are quite well designed and each one appears to have a unique set of behaviors. Neither of the animatronics are friendly so this means that the primary use for this addon is to make the game mode difficult.

Be sure to rate us and see our collection of the best mcpe addons and game worlds for download including sky wars, lucky block, mcpe guns, creature, mini-game and mods.

Five nights at Minecraft is an unofficial App. This application is intended for educational purposes only. This app is not affiliated in any way with Mojang AB. The Name, Brand and the Assets are all property of Mojang AB or they respectful owner. All rights reserved.
