I usually run windows updates daily to get the latest drivers and driver booster updated and fixed my PC drivers extremely accurately even better than windows update did. I'm really impressed with the software and would highly recommend it as a product.

Dunston Diaz.

What a surprise to receive the new Driver Booster from IObit. Once installed and its update began, I hadn't known that half of the programs on my PC were there let alone needed an upgrade. Once upgrading was complete it was as if my PC had a complete makeover. Sensational!
