Completing the CAPTCHA proves you are a human and gives you temporary access to the web property.

What can I do to prevent this in the future?

If you are on a personal connection, like at home, you can run an anti-virus scan on your device to make sure it is not infected with malware.

If you are at an office or shared network, you can ask the network administrator to run a scan across the network looking for misconfigured or infected devices.

Another way to prevent getting this page in the future is to use Privacy Pass. You may need to download version 2.0 now from the Chrome Web Store.

AlwaysAlpha.

You may say, why Alpha? It's old, buggy, and a real pain to keep secure! It seems as if everyone has forgotten it. But not us. We at AlwaysAlpha are dedicated to keeping 2010 Minecraft alive and well.

History.

AlwaysAlpha started in August of 2017 as a spiritual successor to NostalgiaProject (an Alpha server that unfortunately shut down). Though rough at first, the server slowly gained popularity after the first few forum posts and YouTube advertisements were created. To make a long story short, we've had many attacks and other problems along the way. But we are now here, in the middle of even more problems, yet with hope for the future. Not everyone likes us, not everyone thinks we can continue what we say we will, but we will fight to the bloody end to keep this server alive. Now join the server and have an excellent adventure.

How to join the server.

Made 2018 by: xDeathCon, Windows XP Professional, and jm03. Massive credit to jm03 for great remake.

What our Minecraft alpha server is:

AlphaPlace is a Minecraft Alpha server in 2021 dedicated to our players nostalgia. The server was started on April, 7th, 2019. We have been using our current world for 334 days (As of 3/22/2020) and our player record is 31.

The server is running on Minecraft Beta v1.1_02, BUT WAIT! Beta 1.1_02 is the same as alpha 1.2.6 but with server side inventory which

prevents normal players spawning in items and duping, which would ruin the server. The server's ip address is AlphaPlace.tk or AlphaPlace.net (both work).

You can join the Minecraft server by following the tutorial on the website.
