Part 7: How to Modify a Mind Map Template.

The simplest and fastest way to create a mind map is to get started from a template. EdrawMind makes it even simpler and faster by offering advanced tools of diagramming.

1. Auto Generation.

All mind map shapes have 1 floating quick buttons. 1 easy click on it generates a new shape. The newly added shapes are automatically connected, aligned and distributed, saving a lot of time and effort.

2. Auto Relocation.

Every time you add, delete or move a shape, others shapes will relocate themselves smartly to the right position. Compared with hand drawing, this saves a lot of time spent on adjusting and connecting shapes again and again.

3. Auto Re-arrangement.

You can re-arrange all shapes easily to form a new style. This is difficult to do if the mind map is drawn by hand. In Edraw, you can rearrange the whole mind map any time you want, with 1 click. Go to Mind Map tab. Click on the arrangement direction you like. Everything moves smoothly to the right position, leaving no trace of modifications.

4. Text tool.

All shapes are designed with text boxes. Double click the shape to type in your own contents. The smart mind map shapes will enlarge or shrink automatically according to the text.

One click on the mind map theme changes font, color, line and fill style all together at once.

6. Backgrounds.

Just drag and drop your preferable background to replace the default one.

The Mind Map Book HD Scanned PDF.

The Mind Map Book is a classic bestseller written by Tony Buzan – inventor of Mind Map, founder of World Memory Championships, originator of World Speed Reading Tournament, organizer of Mind Sports Olympiad, world's super writer, top speaker in the brain and learning aspects, and global public media figure. All other relevant books were written based on it, and many of the authors are just the students of Tony Buzan around the world.

The mind map originated from Leonardo da Vinci's notes is a groundbreaking thinking tool. It is gradually applied to various fields, such as projects management, reading notes, schedules, business plans, and so on. I believe that many people who have read The Mind Map Book should be shocked by the 25-foot mind map of Boeing Flight Engineering Guide on the wall in Boeing company.

Compared with the traditional paragraph-based reading notes, drawing a mind map has unparalleled advantages: a small space; clear structure; easy to understand and remember. Therefore, mind map can help us quickly grasp the core content of things. From the perspective of knowledge management, mind mapping plays a huge role in preserving, sharing, using and innovating knowledge.

Of course, you may think this book is too wordy, but just downplays many key points, and let alone the brain science. That's because The Mind Map Book was originally written for beginners, it's naturally not as good as David Sibbet's two books: Visual Meetings and Visual Teams, as well as Dan Roam's two books: The Back of the Napkin and Unfolding the Napkin. Anyway, only does it give more thorough theoretical explanation to mind mapping.

Short Notice.

About Missing Links Please feedback any invalid download links you met at AppNee via E-mail, must including post URL and missing file link(s). Then we will try to fix all mentioned links ASAP (that usually takes 7+ days). For now we won't remind you by replying your email as before. Instead, please make a check by yourself then. INFO 1) To finish AppNee's original mission, we still have 3500+ applications to share. And in AppNee's current running mode, this would take 13 years at least. But it is likely that AppNee will make an evolution in a few years. Then AppNee will slow down a lot or be archived with unscheduled maintenance only. 2) Due to job changes, we cannot reply most emails (and emails with content like copyright complaints, threats, extortion will be automatically filtered out via keywords by our local email client). 3) New 3rd-party free file hostings use plan! 4) To see whether some software has been shared by AppNee, use this template. WARNING More and more top-level domain names with word "appnee" are being snapped up by domain speculators. We are dismissive of this and warn these human trash: trying to trick visitors with AppNee's reputation won't work. So please note two points: 1) Now, AppNee merely uses one top-level domain name (appnee.com), all others such as appnee.net, appnee.us are fake; 2) In the future, we will tell everyone our new domain before stop using appnee.com, via email only. So, please do not ask us questions like "Is appnee.net, appnee.us, or remnantnh.com yours?". The answer is always the same "We have only one site, and it's appnee.com now." With IP from countries such as Italy, German and USA increasingly copying and misappropriating AppNee's content and server resources, finally we decided that from October 26 these countries would be forced to conduct behavior detection. And if necessary, we have to block them from accessing all of our websites. This action will take 6 months at least!

Hot Tags.

0) Free.AppNee.com is going to be integrated into AppNee some days later. Then Free.AppNee.com will be removed totally.

1) Starting from 2021.02.16, there will be no new software added to appnee.com with a fixed period. This situation can last from a few months to two years.

2) For software that has been released, except for critical software, the update frequency will be reduced to vX.X or vX (e.g.: v1.1 to v1.2, or v1 to v2).

3) Given that people in some countries are embezzling, selling, and abusing the free resources that AppNee releases, it's possible that AppNee will enable its user registration function. As a result, any unregistered user will no longer be able to access any resources published on AppNee.

Mind map free download:

Bring your ideas to life!

Mind mapping is a great technique that boosts your creativity, improves understanding and memory, and organizes your ideas visually. Moreover, it's great for project management. All of these at the same time.

Thanks to its multiple applications, you can use it in your personal life, at work or school.

Plan and organize.

Mindomo is a simple to use mind mapping software that allows you to create a mind map like a pro, even if you are a beginner. The interface is user friendly and you can find everything easily, right when you need it.

Structuring information using a mind map is more effective than the traditional methods (plain text and notes). Start by writing the central idea and then just add branches or topics with the main connected ideas. After that, you add subtopics to each topic and so on.

This way, you can have a better overview of your thoughts, you can find everything and you memorize it faster.

Create to do lists, project management lists, brainstormings, book summaries, plan business meetings, learn a new language, business analysis, and more.

Collaborate with others.

With Mindomo you can build mind maps along with friends or colleagues and edit it together. More minds are better than one.

Share your mind maps with other people instantly and give them access to edit them. Communicate with each other via the chat available in the software.

You can edit and see all the changes of your team members in real time. Therefore, even if you are at a distance, you can collaborate like you would be in the same place. Moreover, you can see the full history of changes that have been made to the map.

Teamwork projects are simpler when you have real time collaboration. Create and assign tasks to your team members. Everyone will know what to do, you'll keep everything simple and organized. Project management will be easier than ever.

You can choose the option to receive email notifications when you receive new tasks or when someone edits the mind map.

Online-Offline synchronization.

You have two options when you create your maps:

Online: you will have a web based mind map software which you can access from anywhere by logging in to your account. Offline: using the mobile app or the Desktop version of the mind mapping software. You can use these versions without creating an account.

However, you can benefit from both alternatives. Save precious time when you work remotely or you don't have an internet connection. Build your maps offline and synchronize everything with the online account afterwards. You can sync everything with one click.

Presentation mode.

Present your amazing ideas to your friends or colleagues by showing them your mind map as a real presentation. Once your mind map is done you can transform it into a presentation in the same app. You save precious time by not using a different app where you have to start from scratch.

With Mindomo you can choose the slides and select as many topics as you want in it. Moreover, the flow of your thoughts will be emphasized and all the keywords of your ideas will be accentuated.

Most importantly, a good presentation has only essential ideas written on the slides, not huge blocks of texts. The rule 4 by 5 says you should have maximum 4 bullet points (or topics in our case) by 5 words each.

Another well known rule is to have a maximum 33 words per slide. Using your mind map to create the presentation helps you a lot to stick to those tips. This way, your presentation will be the perfect visual support that will illustrate the central idea. You can detail each point verbally and explain it to your audience.
