Adobe InDesign.

Design for printing and digital distribution within reach.

Latest version.

Adobe InDesign is a design tool whose goal is to offer you a good way to create pages for printing or digital distribution.

The quality is borne out by the experience of Adobe and that makes us feel more comfortable, specially because it is totally compatible with other Adobe solutions.

Photoshop, Illustrator, Flash or Acrobat are those applications that have a close relationship with it.

Apart from that, Adobe InDesign offers a huge range of possibilities when creating your own booklets, magazines or newspapers.

Adobe InDesign is one of the best choices out there. It lets you design and preflight engaging page layouts for print or digital distribution with built-in creative tools and precise control over typography. All these with Adobe quality.

Installation error DW050, DW020 | CS5.5 | Windows.

One or more of the following errors appears in the install log when you install Creative Suite 5.5 or Flash Professional CS5.5 (the stand-alone product):

ERROR: DW050: The following payload errors were found during install: ERROR: DW050: - Adobe Flash Player 10 ActiveX: Install failed
ERROR: DW020: Found payload conflicts and errors: ERROR: DW020: - Adobe Flash CS5.5 depends on Adobe Flash Player 10 Plugin to be installed. FATAL: DW020: Conflicts were found in the selected payloads. Halting installation.

If the Adobe Support Advisor sent you to this document: Check the Adobe Support Advisor for any additional errors after reviewing the information in this document. If there are no additional issues and you are still encountering problems, see Troubleshoot CS5 and CS5.5 installation with install logs (cpsid_84451). You can use that document to identify any additional issues.

Solutions.

You can ignore this error and launch the products you were installing.

The CS5.5 installer correctly skips installing its older Flash Player components. However, it incorrectly reports an error at the end of the installation process.

Try to launch Flash Professional. If it launches successfully, then no installation error actually occurred. The error message is false and there is no impact to functionality.

Important: If you have any additional problems with the installation or launching products, another error could have occurred. For help identifying with these other errors, see Troubleshoot CS5 and CS5.5 installation with install logs (cpsid_84451).

Note: To translate this page into another language, paste the URL into Google Translate.

Additional information.

These errors occur when the version of Flash Player that on your system is newer than the version installed by the CS5.5 installer.

Flash Professional CS5.5 Release Notes.

Welcome to Adobe® Flash® Professional CS5.5 . This document contains late-breaking product information, updates, and troubleshooting tips not covered in the Flash Professional CS5.5 documentation.

Minimum system requirements.

NOTE: Flash Professional CS5.5 is a 32-bit application which can be installed on computers with either 32-bit or 64-bit operating systems.

Intel® Pentium® 4 or AMD Athlon® 64 processor Microsoft® Windows® XP with Service Pack 2 (Service Pack 3 recommended) or Windows Vista® Home Premium, Business, Ultimate, or Enterprise with Service Pack 1; certified for 32-bit Windows XP and Windows Vista; or Windows 7 1GB of RAM (2GB recommended) 3.5GB of available hard-disk space for installation; additional free space required during installation (cannot install on flash-based storage devices) 1,024x768 display (1,280x800 recommended) with 16-bit or greater video card DVD-ROM drive QuickTime 7.6.2 required for multimedia features Broadband Internet connection required for online services and Creative Suite Subscription Edition software *

Multicore Intel® processor Mac OS X v10.5.7 or v10.6 1GB of RAM (2GB recommended) 4GB of available hard-disk space for installation; additional free space required during installation (cannot install on a volume that uses a case-sensitive file system or on flash-based storage devices)

1,024x768 display (1,280x800 recommended) with 16-bit or greater video card DVD-ROM drive QuickTime 7.6.2 required for multimedia features Broadband Internet connection required for online services and Creative Suite Subscription Edition software *

In addition to the Adobe Flash Professional CS5.5 system requirements, applications created using AIR for iOS will only run on devices that support iOS 4 or higher and iPod Touch 3rd & 4th generation, iPhone 3GS and iPhone 4, and iPad.

Applications created and published from Flash Professional CS5.5 for Android platforms will run on devices that run Google Android™ 2.2 operating system or higher. For a list of the latest certified devices, please visit www.adobe.com/flashplatform/certified_devices/.

For updates to Flash Professional CS5.5 system requirements, visit www.adobe.com/go/flash_systemreqs.

*Adobe CS Live services are complimentary for a limited time and include Adobe® BrowserLab, Adobe® CS Review, Acrobat.com, Adobe® Story and SiteCatalyst® NetAverages† Learn more.

† This product may allow you to extend its functionality by accessing certain features that are hosted online, including the Adobe CS Live online services ("Online Services"). The Online Services, and some features thereof, may not be available in all countries, languages, and/or currencies and may be discontinued or modified in whole or in part without notice. Use of the Online Services is governed by separate terms of use and by the Online Privacy Policy, and access to some services may require user registration. Some Online Services may be subject to fees and require a subscription. Fees subject to change. For more details and to review the applicable terms of use and Online Privacy Policy, visit www.adobe.com

Install your software.

1. Before you install, close all applications currently running on your system—including other Adobe applications, and browser windows. It is also recommended to temporarily turn off virus protection during the installation process.
2. You must have administrative privileges or be able to validate as an administrator.
3. Do one of the following:

Windows:

Insert the DVD in your drive, and follow the on-screen instructions. If the installer does not launch automatically, navigate to the Adobe Flash Professional CS5.5 folder found at the root level on the DVD and double-click Set-up.exe to start the installation process. If you downloaded the software from the web, the installer will self-extract and launch automatically. If the installer does not launch automatically, open the folder, navigate to the Flash Professional CS5.5 folder, double-click Set-up.exe, and then follow the on-screen instructions.

Mac:

Insert the DVD in your drive, navigate to the Adobe Flash Professional CS5.5 application folder found at the root level on your disk, double-click Install.app, and then follow the on-screen instructions. If you downloaded the software from the web, open the dmg file, navigate to the folder Adobe Flash Professional CS5.5, double-click Install, and then follow the on-screen instructions.

4. If you are installing as an upgrade, the installer will check your system to find the valid upgrade product. If it cannot find it, it will ask you to input the serial number of the product being upgraded. You can also install the software in trial, then input your new and previous serial numbers in the serialization screen shown during launch.
5. If you are installing Flash Professional CS 5.5 Subscription Edition software, you will need to be connected to the Internet. The installer will prompt you if it detects that you are offline. An Adobe ID is required to purchase a subscription. If for some reason, you cannot connect to the Internet, you can install the trial version of the software and input your subscription serial number and Adobe ID during installation. For more information about your subscription software, go to www.adobe.com/go/subscription_learnmore.

Trouble-shooting Installation Issues.

For additional CS5.5 installation help, go to www.adobe.com/go/cs5install.

For more detailed information about troubleshooting your installation, go to www.adobe.com/go/support_loganalyzer.

Uninstall your software.

In Windows XP, open the Windows Control Panel and double-click Add or Remove Programs. Select the product that you want to uninstall, click Change/Remove, and then follow the on-screen instructions. In Windows Vista and Windows 7, open the Windows Control Panel and double-click Programs and Features. Select the product that you want to uninstall, click Uninstall, and then follow the on-screen instructions. IMPORTANT: Mac OS has uninstall functionality. DO NOT drag applications to the trash to uninstall them. To safely uninstall on Mac OS X, double-click the product installer in Applications/Utilities/Adobe Installers or double-click on the Uninstall alias located in the Application folder. Select Remove Preferences, then Authenticate as an Administrator and follow the on-screen instructions.

Note: If you want to install the product on a different computer, you must first deactivate the software on your computer. To deactivate, choose Help > Deactivate.

Trial software.

Features in trial software.

The trial versions of After Effects CS5.5, Flash Professional CS5.5, Adobe Premiere Pro CS5.5 and Audition CS5.5 do not include some features that depend on software licensed from parties other than Adobe. For example, some codecs for encoding MPEG formats are available only with the full version of these products. HDV, XDCAM and AVCHD formats and sequence presets are not supported in the trial for both Mac OS and Windows. Adobe Media Encoder export does not include MPEG-4, MPEG-2, MPEG-2 DVD or MPEG-2 Blu-ray as export formats in the trial. The file importer does not recognize file types that are not included in trial mode (such as MPEG and XDCAM files). HDV is not included as a capture format in the Mac OS version of the trial.

Entering a serial number.

Enter the serial number for the software you purchased in the serialization screen. The serialization screen will load the first time you launch the application. You can enter a serial number for the application itself or a serial number for any Creative Suite that contains the application. If the product you purchased is one of the Creative Suites, you can enter the serial number in any of the applications contained in the Creative Suite. Other applications installed as part of the same Creative Suite will recognize the new serial number the next time the applications are launched. If you purchased Flash Professional CS 5.5 Subscription Edition, you will need to be connected to the Internet and will be required to enter an Adobe ID when prompted.

Only applications running as a trial will recognize the new serial number. If any of the applications have already been serialized with a different serial number, it will continue to use that serial number until you remove the older serial number using the Help > Deactivate > Deactivate Permanently. Then on the next launch of the application, it will recognize the new serial number.

The serial number you purchased is for the use of the software in a specific language, and will only be accepted by a product installed in that language.

Volume licensing.

Volume licensing customers cannot purchase from a trial directly. However, a volume licensing serial number can be used to serialize all Creative Suite applications, including the Acrobat X trial. Please contact your reseller or authorized Adobe licensing center to place an order for a volume license. To find a reseller in your area, go to www.adobe.com/go/resellerfinder_en.

Electronic licensing.

You must accept the license agreement and warranty terms to use this product. See www.adobe.com/go/eulas for details. This product may automatically attempt to activate over the Internet. See www.adobe.com/go/activation for details.

Registration information.

Creating or entering an Adobe ID registers your software and sets up access to Adobe CS Live online services. In order to take advantage of your complimentary subscription of CS Live services, and get up-to-date product information, training, newsletters, and invitations to Adobe events and seminars, you must register your product. Please note that if you purchased Flash Professional CS 5.5 Subscription Edition on the Adobe Store, your product is already registered and you already have access to Adobe CS Live online services.

Flash Professional CS5.5 AIR Support.

Flash Professional CS5.5 and the Android Market.

Flash Professional CS5.5 now supports the publishing of AIR applications for Android so developers can deliver applications to the Android Market. Developers will need to establish an account with the Android Market to publish their application. For more information, visit <http://market.android.com/publish> to set up an account.

Apple App Store Submission Requirements.

Developers can deliver applications built with AIR for iOS to the Apple App Store. This requires the developer to be a member of the iOS Developer Program and follow the program guidelines.

A developer certificate from Apple is required in order to test and deploy applications to iOS devices. Apple provides information on its developer programs at <http://developer.apple.com/ios/>.

For the latest information about Adobe AIR releases, go to http://www.adobe.com/go/learn_air_relnotes_en.

Known issues with Flash Professional CS5.5.

Submitting Bugs & Feature Requests.

To submit feature request and bugs for Flash Professional, please send our team an email by completing the following form: <http://www.adobe.com/go/wish/>.

Customer care.

Customer Service.

Adobe Customer Service provides assistance with product information, sales, registration, and other non-technical issues. To find out how to contact Adobe Customer Service, please visit [Adobe.com](http://adobe.com) for your region or country and click on Contact.

Support Plan Options and Technical Resources.

If you require technical assistance for your product, including information on complimentary and fee-based support plans and troubleshooting resources, more information is available at <http://www.adobe.com/go/support/>. Outside of North America, go to <http://www.adobe.com/go/intlsupport/>, click on the drop down menu under the question "Need a different country or region?"; choose a different country or region, then click GO. An alternate method is to click on Change beside the country name at the top of the screen to select a different country or region.

Free troubleshooting resources include Adobe's support knowledgebase, Adobe user-to-user forums, Adobe Support Advisor and more. We are continually making additional tools and information available online in order to provide you with flexible options for resolving issues as fast as possible.

Macromedia/Adobe Flash Tool.

Lightweight, yet intuitive application that allows you to compress or decompress SWF files, as well as adding certain EXE standalone players.

What's new in Macromedia/Adobe Flash Tool 1.8:

Adobe removes all older Standalone Flash Player files, only latest player available Now Add missing const to declaration of miniz array, no .data section, less executable Size.

Handling certain SWF files can prove difficult, especially if they cannot be decompressed with ease. For these problems, there are certain software solutions, one of them being Macromedia/Adobe Flash Tool. It allows you to compress or decompress SWF files, or make them standalone versions, by adding an executable Flash player.

Reliable and easy to use Flash manipulation tool with comprehensive GUI layout.

The application gives you the possibility to handle SWF files, by adding or removing any standalone Flash player encased within the files. Furthermore, you can easily compress and decompress your SWF files, in order to optimize file size and quality.

Adding a standalone Flash player has a multitude of uses, as you can, for instance, create a SWF presentation that needs to be as portable as possible, in order to be able to run on any computer.

Handy and intuitive SWF compression utility that can insert Flash players into files.

Macromedia/Adobe Flash Tool can be used to create standalone versions of certain SWF files, by integrating them with a Flash player. The program is flexible, as it can manipulate SWF files with ease.

As an example, if you do not have a SWF player available, you can extract one from standalone SWFs, then add it to your other Flash files instead of browsing the Internet for a reliable download location.

A lightweight, yet dependable Flash compression and decompression tool.

With the help of Macromedia/Adobe Flash Tool, you can optimize your SWF files, by compressing or decompressing them, as well as adding standalone Flash players in order to make them portable and software-independent.

To draw a conclusion, the application helps you manage your Flash files with ease, by increasing or decreasing their compression ratio, or optimize them for usage on any computer they are saved onto.
