They Might Be Giants Nanobots.

a catchy and surprisingly toothy power-pop gem Stereogum

There aren't a lot of bands who can open an album with the line "Hi, Your head is on fire" and have it sound not only cool, but for the said lyric to be one of the album's less ostentatious declarations. With Nanobots - They Might Be Giants' 16th studio album - the band offers up a musical landscape of black ops, microscopic robots, insect hospitals, and karate chops - as well as a sprinkling of mini-ruminations clocking in at well under the one-minute mark. For a group that has made a career out of crafting unforgettable melodies while deftly illuminating the odd, Nanobots is a remarkable achievement - 25 tracks that zig and zag in a myriad of new directions including the very adult topics of melancholy and alienation, while showcasing the band's expert musicianship and undeniable skill at crafting perfect pop productions.

Formed in 1982, They Might Be Giants are themselves giants of a sort in the pantheon of alternative-indie-college rock (or whatever you wanna call it). Emerging out of NYC's East Village performance scene with a singular take on art-pop, the dynamic duo of John Flansburgh and John Linnell would break big at the dawn of the 1990's with their platinum LP Flood, one of the most beloved "alternative rock" albums of all time. In the following years the band would go on to dip their creative toes in a variety of different pools - not only releasing a slew of excellent albums, but also making music for television and films, snagging a couple of Grammy awards, and serving as the subject for an acclaimed documentary about their career (Gigantic: A Tale of Two Johns). Over the course of three decades they've also managed to engender a coterie of intensely devoted (some might even say obsessive) fans who are prone to following the band around Grateful Dead-style whenever They Might Be Giants hits the road. It's certainly a great track record for any band... particularly for one more well-known for accordion heroics than guitars and whose most classic songs involve birdhouses and ancient cities.

So, when you are already 15 albums deep into a career that spans over thirty years, what do you do next? If you are They Might Be Giants, you simply do what you've always done - you gather your friends in NYC (in this case producer Pat Dille and regular They Might Be Giants cohorts Stan Harrison, Jon Graboff, Jedediah Parish, and Chris Thompson) and follow your creative impulses wherever they happen to lead you. In the case of Nanobots, the resulting album is a collection of skewed narratives that present a kind of through-line to the band's earliest work - herky jerky pop songs sprinkled among a variety of truncated mini songs, all of them begging to be sung along to.

"There is a thread that runs along everything we've ever done," says John Linnell. "We're always trying to do new things - new styles, experimenting with things that are pretty/ugly or kind of atrocious sounding or purely weird - but we also love pop songs. Despite how we may try to change things up, I think we're still trying to meet the same kinds of criteria ultimately. We are still, in the end, trying to make songs that we want to hear."

"When you enter a studio to make your 16th record, you might assume the stakes couldn't be any lower," jokes John Flansburgh, "But we really approached this project with a level of intensity and focus that rivals anything else we've ever done. I think the sonics and musicality of what we've been doing for the past couple of years are actually quite evolved from where we started, but at the same time we really pared things back. We tried to come at this record with a lot of restraint, to see how minimal we could be with the song arrangements. That was really our challenge this time around. Some of the songs are crazy sparse. It's kind of amazing to me that it took us sixteen albums to get around to trying some of these ideas. It's also reassuring to know that you can make music for this long and still uncover these new ideas. There are definitely points in Nanobots that feel like a new direction for us."

So, what then is a Nanobot? According to reliable Internet sources, a nanobot is "a hypothetical, very small, self-propelled machine, esp. one that has some degree of autonomy and can reproduce." Given the microscopic nature of songs like "Tick," "Hive Mind," and "Didn't Kill Me," it's easy to see how the idea of the tiny creation with the capacity to accomplish big things might serve as a guiding principle for the entire record, so much of which is built upon a kind of purposeful brevity. That being said, the album still boasts a variety of three-minute pop gems - "Call You Mom," "Nanobots," "Lost My Mind" - that rank among They Might Be Giants's most instantly catchy tunes.

"I like the idea of short songs," says Linnell, "It's just gonna dilute the power of the idea if we make it longer. There's no need to force another verse and chorus if the song doesn't need one."

"There isn't necessarily a logical explanation to why Nanobots seemed like such an important title for the entire record, but I like the idea of these tiny things that are designed to do a very specific thing - they can replicate themselves in whatever way they might need to in order to do the required job. And I like the idea of self-replicating. Humans do that by having children. It's not necessarily a logical process, it's just something that happens. You unleash this force - a child or a microscopic robot - and then it goes out into the world and does its thing... in a way you can't always control."

"We came of age in the time of albums," says Flansburgh, "So we were raised on the notion that songs - when collected together - serve to amplify and support each other when part of a well-considered collection. That's the power of the album. With Nanobots we weren't making a concept album, but it does have a certain power as a kind of song cycle. These short little tiny songs have a purpose and they make sense when surrounded by the longer songs. There's a certain mania to this record, a certain energy you get when you include all these hard working miniatures."

There are few bands currently in operation that can boast a thirty year career, let alone boast a career that includes 16 studio albums - including four beloved albums for children - and a history of embracing emerging technologies (the band's brilliantly curated iPhone app recalls their early "Dial-A-Song" days), but the genius of They Might Be Giants - and perhaps the secret to their success - is that they continue to operate within their own world. Three decades in, there is still no other band that sounds like them and - even more importantly - very few artists that approach songwriting with the kind of wide-eyed, natural curiosity as They Might Be Giants. Whether they are singing about tiny robots, broken hearts, combustible heads, or ticks, they do it in a vernacular that is uniquely their own.

Nanobots.

They Might Be Giants seemed creatively revitalized with the release of 2011's *Join Us*, their first set of songs that were aimed at grown-ups -- or at least, that weren't obviously kid-focused -- in some time, and they continue that trend with *Nanobots*. As on *Join Us*, John Flansburgh and John Linnell often feel like they're riffing on their extensive discography as they deliver moments of pure comedy like the literal-minded album opener "You're on Fire" and educational tidbits such as the sweet song-biography "Tesla." However, the clearest nod to the duo's past comes in the smattering of songs that clock in between a handful of seconds and just under a minute, echoing They Might Be Giants' Dial-A-Song roots as well as Apollo 18's "Fingertips" suite. Sometimes the fragmented nature these snippets lend to *Nanobots* provides some short-attention-span instant gratification; at other times, they detract from the longer songs' flow. Yet even with the inclusion of these ultra-short tracks, the album isn't as wacky as *Join Us* was occasionally. Instead, the Johns opt for a slyer approach, emphasizing clever wordplay on songs like "Icky" and sophisticated arrangements that borrow from lounge, chamber pop, and in the case of "The Darlings of Lumberland," free jazz. Linnell and Flansburgh both contribute several songs worthy of inclusion in the upper echelons of the TMBG songbook. Linnell's "Call You Mom" is the brightest highlight here, and the most adult-oriented, packing layers of twisted and repressed childhood feelings of abandonment and substitution into just over three minutes of sax-heavy rock & roll. He's often at his best when tracing the loopy ways the mind works (or doesn't), and "9 Secret Steps" and "Stuff Is Way" -- a rhythmic word soup that coins the phrase "catastro-feeling good" -- are two fine examples of this. Meanwhile, Flansburgh's "Circular Karate Chop" sets advice from a very warped sensei ("assign regret to those accountable") to some of the duo's quintessentially bouncy power pop; the adorable "Too Tall Girl" manages to be lumbering and graceful as it rhymes "etiquette" with "Connecticut"; and "Sometimes a Lonely Way" serves as a reminder that when this band does sad, it does it like few others can. At times, *Nanobots* feels like *Join Us*' more melancholy flip side, and even if this album isn't quite as immediate as the one before it, it shows how They Might Be Giants can continue in the vein they've excelled at for decades and build on it, too.

They Might Be Giants Instant Fan Club.

They Might Be Giants Instant Fan Club began in April 2011 and has been continued in most years since then. The IFC, as it's commonly known, features recordings distributed under Idlewild Recordings and various other benefits, including exclusive physical goods. Artwork for the Instant Fan Club is generally designed by Paul Sahre.

The advent of the 2015 Instant Fan Club saw the creation of a new site, [tmbgifc.com](http://tmbgifc.com), which has been utilized since for new signups.

Contents.

2020 Fan Club [ edit ]

Also known as Instant Fan Club: BOOK Edition , signups began on July 16, 2020 with 10% of proceeds being donated to Black Girls Code and Partners in Health.

While the 2020 IFC began with 5,000 membership slots and the intention of remaining open for signups until September, the goal was reached sooner than expected and an additional 800 slots were added, thanks to the band tapping into a supply of Cease and Desist books they'd intended to sell on tour (which was delayed due to COVID-19). Signups were closed when the limit of 5,800 members was reached on August 6.

Benefits [ edit ]

[2015 Fan Club \[ edit \]](#)

The Instant Fan Club returned for 2015 with an announcement in November 2014. There were initially 2,500 subscriptions available, which were meant to be available until January 5, 2015. All 2,500 spots were filled by December; however, the band kept subscriptions available for an extra week to make up for their failure to notify fans that subscriptions had nearly sold out. As the return of the IFC coincides with the rebirth of Dial-A-Song, the subscription is focused around the 52 new tracks TMBG will be producing for Dial-A-Song in 2015. In addition to the regular level of membership (\$98) and the Super-President tier (\$250) introduced in 2012's fan club, the 2015 IFC offers a third option "for folks on a budget", Dial-A-Song Direct (\$30).

[Description \[ edit \]](#)

From the official press release:

[Benefits \[ edit \]](#)

[Dial-A-Song Direct \[ edit \]](#)

Dial-A-Song Direct subscribers will receive the 2015 Dial-A-Song tracks as they are released in 320kbps MP3. A new track will be emailed to subscribers each Tuesday. This is also a part of the regular membership level.

[Regular Membership \[ edit \]](#)

An autographed CD copy of Glean A CD copy of Why? A CD copy of Phone Power A DVD copy of Live In Berlin , a recording of TMBG's performance in Berlin during the Nanobots tour 320kbps MP3 copies of each new Dial-A-Song track, as they are released Access to a web broadcast of one of the shows on TMBG's upcoming tour in Spring 2015 Two tickets to any They Might Be Giants concert An IFC 2015 T-shirt Two TMBG-branded balsa wood toy airplanes A certificate of thanks A 2015 membership card and bumper sticker.

Members also had the option to purchase additional IFC shirts. As in previous years, TMBG anticipates that other rewards will be made available later on.

[Super-President Membership \[ edit \]](#)

In addition to the regular membership benefits, Super-Presidents also receive:

An LP copy of Glean An LP copy of Phone Power An autographed, limited edition 180 gram LP reissue of Flood An exclusive IFC coin designed by the Office Of Paul Sahre Each subscriber's name is listed in the liner notes of Phone Power .

[2012 Fan Club \[ edit \]](#)

The Instant Fan Club's second year was open to all 2011 members, as well as 2,500 new members, with a cut-off date of April 26. There were two tiers of membership available, regular membership for \$95 and "Super-President" membership for \$250. According to John Flansburgh, there were around 1,500 regular members and 700 Super-Presidents.

[Description \[ edit \]](#)

From the official press release:

[Benefits \[ edit \]](#)

[Regular Membership \[ edit \]](#)

In August: A 7" vinyl EP with new recordings: "Some of these songs might be on Album 16 in this form or another, others might be experimental in nature. We're leaving this disc open-ended!" In August: A CD of At Large: Best of TMBG Live 2011 . Formerly a download-only release for 2011 Instant Fan Club members, "it has expanded and is now being presented on a mastered, super-shiny compact disc, and the beautiful cover photography is by Mr. John Linnell himself!" In October: A 7" vinyl EP ("SUPER SECRET, highly-deformed, multi-song") with IFC exclusive material: "New album outtakes, demos and ephemera." In October: A 7" vinyl EP "especially for kids! This disc previews TMBG's next kids project on secret colored vinyl! Share the joy of vinyl with the next generation!" Three top-secret exclusive webcast "shareholder reports" from the Avatars of They Access to the They Might Be Giants Instant Fan Club Tumblr blog In December: Exclusive access to a webcast of one of They Might Be Giants' holiday shows in Brooklyn in December In early 2013: A download of They Might Be Giants brand new Idlewild Recordings adult album on its release day A 2012 IFC bumper sticker, iron-on logo patch, guitar pick, and 2012 Instant Fan Club t-shirt in bright blue A Blue Canary Night Light: "Folks have made us aware of this fantastic nightlight in the last year. We think it's the perfect item for any true TMBGer." An entry into the Instant Fan Club lottery: "All IFC members will be entered in a lottery to win one of five hand-painted 'The Governor' ukuleles. TMBG guitarist John Flansburgh will personally paint the likeness of his beloved cat The Governor on five ukuleles. Judge John Hodgman will pick the winners, and all ukuleles will include a letter of authenticity signed by John and John and Judge John Hodgman."

Members also had the option to add the upcoming TMBG album Nanobots on LP or CD, extra IFC shirts, or, for a limited number of purchases, last year's exclusive EP to their subscription for an extra fee.

[Super-President Membership \[ edit \]](#)

In addition to the above, Super-Presidents receive the following, copied verbatim from [theymightbegiants.com](http://theymightbegiants.com)

A personalized, custom-made outgoing phone message OR a personalized, custom-made ringtone on mp3 by They Might Be Giants. Yes, these messages will feature YOUR NAME, original music by TMBG, and will be approximately 5-15 seconds in length. Your name listed in the digital, vinyl, AND the CD artwork of the new album. A custom-designed, limited edition 2" commemorative coin created by Paul Sahre from the Instant Mint. We can't ensure this 2012 Instant Fan Club Super-Presidents coin will increase in value, but we sure hope so! A custom-designed "Certificate of Thank You" poster featuring photographs by John Linnell with graphics by Paul Sahre. The dimensions are 11" x 11" and it is full-color offset on good paper. Your choice of either an autographed CD or autographed vinyl copy of Album 16 plus the digital download in mp3 AND flac. A custom-designed, full-color, limited edition embroidered IFC commemorative 3" cloth patch designed by Paul Sahre.

[2011 Fan Club \[ edit \]](#)

The Instant Fan Club's first offering was open to 1,000 members, with sign-ups beginning on April 4, 2011 for \$80. All 1,000 spots of the club were filled by April 5, just 24 hours later.

Back the Way We Came: Vol. 1 (2011 - 2021)

Noel Gallagher's High Flying Birds.

WHEN WE ALL FALL ASLEEP, WHERE DO WE GO?

From 2001, The Black Keys have been reminding the world about the real roots of the Blues, cutting away all the frills and unnecessary solos. Their music has always been untamed, abrupt and minimalist. Dan Auerbach and Patrick Carney developed this unique style over the course of two decades, without once selling their souls to the devil at a Mississippi crossroads. Here are ten songs to prove it.

The musicians of Northern Europe have always brought their personal Arctic twist to all genres of music, and the world of electronic music is no exception. Here's an overview of 11 Danish, Swedish, Norwegian and Finnish artists who have taken techno, house, disco and dub towards new horizons.

From the White Stripes to his time in the solo wilderness, Jack White has been foretelling the doom of a clapped-out rock'n'roll. The genius with a thousand projects has a new prophecy: rock is coming back. While we await its return, here's a look back at the White phenomenon.
