Google Play Games.

Google Play Games is Google's answer to the iPhone's "Game Center"; it allows users to easily track their progress in games and compare it to their friends' progress.

Google Play Games was a very necessary addition to the Android game family. It establishes a universal baseline for gameplay and comes complete with achievements, levels, high scores, and more. It makes the Android feel a lot more like a gaming community platform rather than a bunch of isolated apps to play alone. Unfortunately, this was a little bit late to the gaming ring. Apple's Game Center was so successful because it was included with iOS by default.

There's no argument that Google Play Games is a sturdy piece of software. Reviews are generally positive, and there are no known major bugs. However, because it's not included by default, many players aren't aware that it exists or do not care enough to install it. Additionally, it's not automatically integrated in games due to the Android app store's decentralized nature. If more players would join the system, Google Play Games would make for a very fun, universal experience.

In short, this app is a great concept and executed well. Players can easily access their stats and compare them to other players. The achievements feature is especially interesting and makes it feel almost like a console gaming experience. Nonetheless, most players would agree that what makes any multiplayer gaming platform is the player count. Google Play Games just doesn't have the player count, but there's no doubt it will eventually amass many more players.

Google Play Games for Android.

Thanks to Google Play Games, playing interesting and popular games with a global user base has never been easier. With Google's game development, tracking, and recording environment, you can keep up with industry trends, download platforms, latest news, and reviews.

Easy-to-use dashboard to track gaming activity.

Simply put, Google Play Games is a platform that enables gamers to choose from a wide range of classics as well as new games. The biggest advantage of this gaming environment is that you're given a centralized system. It allows you to keep track of game activity, progress, and achievements in one place.

Google Play Games allows you to share information with other players in live competitions. Additionally, you can record activity to be shared on various social networking channels. While you'll find numerous hundreds of games already, the platform keeps updating its inventory on a regular basis.

All your games in one place.

It is the perfect dashboard for your gaming needs on Android. It's kind of similar to PS3, Steam, and Xbox dashboards, providing you with an overview of activity while keeping you engaged with other players. In simple terms, it gives you access to a wide range of actionable features for a better gaming experience.

You can get a consolidated list of downloaded titles on your Android device. Additionally, if the games have Google Play Games compatible support, you can view achievements and record activity.

The platform also gives a detailed overview of the games you've played recently, and the titles you've installed on your device. Most importantly, gamers can browse numerous popular and featured titles supporting multiplayer capabilities.

A comprehensive dashboard for a huge community.

While using the dashboard, you'll be able to see all the friends who're online. Additionally, you'll be able to view their gaming activity, which allows you to engage in multiplayer games, product launches, and competitions together. Since it's an Android app, it's more convenient to use on the go.

Finding multiplayer games is probably the best use of Google Play Games. With millions of gamers around the globe, the moment you start using this app, you're connected to a huge community.

If you've always been a social gamer, this app wouldn't disappoint. For a long time, Android has needed an app to combine gaming experience

with a community-like experience. With a simple interface, huge inventory of popular titles, and regular updates, Google Play Games is the perfect offering to build and enjoy gaming networks.

Where can you run this program?

Google Play Games is available for all versions of Android. However, the support varies from one device to another.

Is there a better alternative?

There are other similar programs you'd want to check out. Nakama, developed by Heroic Labs, is a social server for games and apps. It offers support for groups, storage, leaderboards, social friends, in-app chat, and multiplayer. However, the interface is pretty complicated, and unless you're a developer, you'd find it difficult to understand.

BoomBaxer is another platform trying to bring gamers in one place. If social gaming is your go-to genre, this platform will let you connect with gamers from all parts of the world. While it has a strong community, it's only available as a web version, which could be a deterrent for some people.

Another good choice is Plato. It combines group games with in-app chats to focus on social networking. While it's an interesting choice, the platform currently has only a few games.

Our take.

Overall, Google Play Games is an excellent product. The implementation has been amazing. It provides gamers with a customized dashboard to keep track of gaming activity and interact with other players from around the world. Since new-generation console games and PC games have similar dashboards for most platforms, Google Play Games is a must-have.

Should you download it?

Yes, definitely! The platform is free, receives regular updates, comes with a clean interface, and allows you to track gaming activity in one place. You can also browse popular titles and download them on your device. While some subtle improvements in search filters would be excellent, Google Play Games is still a great choice.

Many Android users often remove Google Play Games store mistakenly. If you do not like playing games and often do not play games, this does not affect much.

Google Play Games: Best games store.

However, you will find it very inconvenient to download games or play games with your friends. Anyway, you do not need to worry because you can download this app to your phone by APK file below this article. Before, let's take a look at some of the features that this app offers you.

Download and manage your games.

As always, you can search for games and download your device easily in Google Play Games. After downloading the game, you go to the Installed folder to view the list of games you have downloaded and then select any game to start. Google Play Games saves your gaming history in your Google Play account. That is best thing ever. If you incidentally deleted the game, just reinstall and log in, you will continue playing at the time before you delete. What happens when you set the record or accomplish difficult tasks, then you accidentally delete the game? With Google Play Games, you do not need to worry about this. Also, the app always recommends the best games, the most multiplayer games or the new weekly games for you to explore.

Social networking for gamers.

When using Google Play Games, you are connected to your friends and family. You can see their avatar, their profile. Moreover, you can know what games they played, their record is how much. This brings good things and also bad things. It is great that you can know the latest games of your friends, then find them and join them. You can invite them to play the games you love. Apps make the game even more fun when connected with friends. Surely you will have fun moments together.

You can challenge your friends and compete on Google Play Games's rankings. One day, you surpassed the record that your best friend is proud of. That feeling is great. Besides, the app has a feature that allows you to live-stream your gaming experience. You can share great tips, difficult techniques or simply show off your master's skills for your friends to enjoy.

However, if you have 29061 friends, and they do not play any games? What is waiting for you is a huge list of empty profile for you to pull tiredly. Overall, while there's still a lot to do, Google Play Games is still a very useful app that allows you to interact and make friends with players around the world.
