5 best Minecraft modpacks to play with friends in 2021.

The best part about playing Minecraft is being able to join forces with friends and other players to enjoy the game as a collective.

Modpacks are great for this as players can work together to learn about and make their way through the different additions to the game, from small things like battling different new mobs and bosses, all the way to exploring new dimensions and working out different forms of technology.

There are so many Minecraft modpack creators out there who work with different aspects of the game, so there really is something out there for every type of player to enjoy. A lot of modpacks account for the different types of people that exist in friendgroups, too, since there are usually a lot of wholesome additions in addition to hardcore and technological aspects to them too.

Here is a list of some of the most downloaded modpacks that are recommended to play as a group. Maybe check some out with a group of friends this year!

Best Minecraft modpacks to try with friends.

#### 5. Nature's Beauty.

The Nature's Beauty modpack is the perfect modpack for friendgroups who wish to have an enhanced vanilla Minecraft experience. This modpack does its best to just further the extent of the classic vanilla Minecraft world by adding some new generated structures, biomes, mobs, and more without overwhelming players.

This modpack has a really cute community surrounding it, its own series on youtube to check out, and more. It's a brilliant pack for players who like to be more wholesome and focus on the aesthetics of the game rather than the hefty technology side that some players enjoy. It's really cute, has amazing views and landscapes, and works really well with texture packs and shaders.

It's definitely one to check out for players without large gaming setups in addition for those players just getting into the modded Minecraft scene.

#### 4. Valhelsia 3.

The Valhelsia modpack series has a really large following in Minecraft. It's a technology-based modpack that improves gameplay exponentially. Those players that love to focus on creating a self-sufficient area should really look into this modpack.

The developers work so hard to make sure that the mods added in each pack are only of the best quality, and there are a broad variety of mods for all types of players to enjoy. There's a discord server for people to join with a bunch of moderators and admin, as well as community members, who are incredibly knowledgeable and are all ready to help answer any questions.

It's really a modpack to look into if players want to get into a new community as well as play with their friends on a custom server.

#### 3. SevTech Ages.

SevTech Ages is an amazing Minecraft modpack for those players that love to explore the different types of modded technology that can be added into Minecraft.

This modpack has an amazing progression to it, as it works through different time periods of technology from the stone ages all the way to space exploration. This is a perfect modpack to try out with friends, as there is so much to do and work on as a group as well as individually. Players can make their way through the technological ages on their own, or work together to make a spaceship to use as a group!

This modpack has so much to enjoy for all types of sciency players, and the technology is really fun to figure out.

#### 2. Pixelmon.

The Pixelmon mod for Minecraft is absolutely amazing and already has a really credited cult-like following. Players who spent a lot of time in their youth playing the different Pokémon games will really enjoy this modpack, as it adds catching, battling, and gyms from the Pokémon game into the world of Minecraft.

Pretty much every pokémon that can be found in any Pokémon game will now be found around the minecraft world, and they spawn in relation to the biomes that they can be found in inside the Pokémon game.

Gyms and healing stations can be found as new generated structures around the world, all new blocks and items like pokéballs can be found and crafted, and so much more. There are even Pixelmon servers to play on with this modpack.

This modpack has a lovely community surrounding it, so players who wish to play Pokémon in Minecraft can really dive in and be fully immersed in the game straight away.

#### 1. X-Life 2.

This modpack was created to replicate the well known X-Life series that a bunch of popular Minecraft youtubers are currently taking part in, including LdShadowlady, SmallishBeans, DangThatsALongName, FWhip, and more.

This modpack is absolutely amazing to play through. It brings a lot of wholesome mods into the game while also improving the general Minecraft gameplay with adventuring and exploration mods, technology mods, new mobs and creatures, and so much more. This It is a bit of a heavy modpack, so players will need a powerful computer, but it's completely worth it. With the new life system where a player starts with one heart and slowly increases in the number of hearts each time they die, there's this added aspect of friendly competition between players and friends as people try to keep their hearts as low as possible for as long as they can.

This is a really recommended Minecraft modpack for friends, as it's got a great balance of technology, cuteness, and exploration to suffice for every kind of player. As an ongoing series on Youtube, as well, players have a great source to find inspiration for what to search for, what to make, and more!

Due to licensing reasons, the players will also need to download a few additional mods from this link to have the full experience, but it's absolutely no trouble and these mods aren't necessary to experience the full effect of the modpack.

[Top 15] Minecraft Best Servers That Are Fun (2020 Edition)

Undoubtedly one of the best features of Minecraft is its multiplayer servers. There are so many outstanding servers out there that provide vastly different experiences for players. Today, I'm going to be counting down some of the best Minecraft servers that are fun as of May 2020.

Please note that the servers included on this list are meant to provide diversity as well as community popularity. Thanks!

15. WesterosCraft.

Come one come all builders! This unique server is completely dedicated to recreating the entire world of Game of Thrones in Minecraft. With over 1.5 billion blocks placed over a total of 7.5 square miles, the community is well on its way! This project has been in place since 2011!

What Makes this Server Awesome:

This server is unique in that players can logon to pay a quick visit or become a long-standing builder and aid in the creation of the server. As of May 2020, a total of 287 projects have been completed and 65 are in progress. With the remaining 127 projects waiting to begin, players are waiting to begin building.

Server Details:

Player limit: 100.

Check out their website: <https://westeroscraff.com/>

14. ImagineFun.

Welcome to the happiest server in Minecraft! ImagineFun is a Disneyland remake in the world of Minecraft, with rides, shops, and even those yummy churros. Included on this list for its uniqueness and growing player base. (Must launch Minecraft version 1.12.2 to play).

What's Awesome About this Server:

Players experience replicas of real-life attractions. Server-specific texture pack and sound pack. Nightly firework shows.

Server Details:

Player Limit: 3240.

13. HiveMC.

Come one come all mini-game lovers. HiveMC is a server that has been around for 7 years, that's a dedicated player pool! Included on this list for its dedicated staff, ability to stand the test of time, and endless mini-game options, players will have countless hours of fun here.

What's Awesome About this Server:

HiveMC offers 31 game modes. Large player base with over 500,000 unique players logging in every month. Available on Java and Bedrock.

Server Details:

Player limit: 20000.

Check out their website here: <https://hivemc.com/>

12. Minewind.

Do you hate rules? Do you enjoy griefing and PVP? If you do, Minewind is a great server for you to play. Focused on maintaining an enhanced-vanilla anarchy survival feel, this server is sure to be your survival fix. It ranks lower on my list for its R18+ (restricted for adults) rating.

What is Awesome About this Server:

Custom coded features. Special server events. Items ranks and more obtainable by playing.

Server Details:

Player limit: 1000.

11. Pirate Craft.

Ahoy Matey! Climb aboard the crew and join this pirate-themed Minecraft server! Pirate Craft is a mature server with working ships and cannons. Much like MineWind, this server is ranked lower due to its restricted age rating.

What Makes this Server Awesome:

Players can build their own custom ships and sail the oceans. Equip cannons to battle other ships. In-game ranks to earn better ship gear.

Server Details:

Player limit: 100.

10. PixelmonCraft.

Gotta catch 'em all! For fans of pokemon and the popular Minecraft mod Pixelmon, this is the server for you. Catch your favorite pokemon and battle other players!

What Makes this Server Awesome:

Split over multiple servers based on the Pokemon regions. Recreates areas and towns from Pokemon games. It uses Pixelmon and makes it multiplayer.

Server Details:

Player limit: 1000.

9. PotterWorldMC.

The magical world of Harry Potter is in Minecraft! Fly your broomsticks on over to PotterWorldMC to experience life at Hogwarts and explore the wizarding world from the popular book series.

What Makes this Server Awesome:

Custom resource pack. Live magic classes. Server is run solely on plugins.

Server Details:

How to install Data Packs.

To install a data pack you need to download the provided zip file and copy it into your world's "datapacks" folder. There is no need to unzip the file unless you are going to modify it.

Once the pack is in the right folder go to Minecraft and run the command /reload.

You should see a message saying that the data pack is installed.

You could also run the command /datapacks list and the installed data packs should be displayed.
