IMPORTANT : The official Kodi version does not contain any content what so ever. This means that you should provide your own content from a local or remote storage location, DVD, Blu-Ray or any other media carrier that you own. Additionally Kodi allows you to install third-party plugins that may provide access to content that is freely available on the official content provider website. The watching or listening of illegal or pirated content which would otherwise need to be paid for is not endorsed or approved by Team Kodi.

In Softonic we scan all the files hosted on our platform to assess and avoid any potential harm for your device. Our team performs checks each time a new file is uploaded and periodically reviews files to confirm or update their status. This comprehensive process allows us to set a status for any downloadable file as follows:

It's extremely likely that this software program is clean.

What does this mean?

We have scanned the file and URLs associated with this software program in more than 50 of the world's leading antivirus services; no possible threat has been detected.

This software program is potentially malicious or may contain unwanted bundled software.

Why is the software program still available?

Based on our scan system, we have determined that these flags are possibly false positives .

What is a false positive?

It means a benign program is wrongfully flagged as malicious due to an overly broad detection signature or algorithm used in an antivirus program.

It's highly probable this software program is malicious or contains unwanted bundled software.

Why is this software program no longer available in our Catalog?

Based on our scan system, we have determined that these flags are likely to be real positives.

We'd like to highlight that from time to time, we may miss a potentially malicious software program. To continue promising you a malware-free catalog of programs and apps, our team has integrated a Report Software feature in every catalog page that loops your feedback back to us.

Flag any particular issues you may encounter and Softonic will address those concerns as soon as possible.

Don't Get Hacked!

Most cord-cutters use IPVanish VPN and rightfully so.

The free streaming applications, addons, and paid IPTV services are usually hosted on insecure servers.

These shady outfits log everything that you access through their app or service.

Without IPVanish, your IP Address is being logged along with everything that you access through it.

Your IP Address points back to your location and identity which compromises both your privacy and security.

Your current identifying IP Address is 173.25.156.140.

When you use IPVanish VPN, your IP address is masked and converted into an anonymous one.

IPVanish VPN will provide you with an anonymous connection to the Internet.

This will prevent your Internet Service Provider, app/addon developers, government agencies, and other 3rd parties from logging what you're accessing online.

Setting up IPVanish VPN on your streaming device is simple!

Step 1 Register for an IPVanish VPN account by clicking the link below.

This special link provides you with a large discount.

Step 2 – From the home screen hover over Find.

If you're using an Android TV Box, you can also find the IPVanish application in Google Play Store.

Step 3 – Scroll down and click Search.

Step 4 – Type in "Ipvanish" and click the first option.

Step 5 – Click the IPVanish VPN app.

Step 6 – Click Download.

Step 7 – Once the IPVanish app installs, click Open.

Step 8 – Enter your IPVanish account information and click Log In.

Step 9 – Click Connect.

Step 10 – Click OK.

Step 11 – That's it! You have installed IPVanish VPN on your Firestick/Fire TV.

Now, click the home button on your remote and the VPN will continue running in the background.

Congratulations! You are now protected by a VPN which means everything that you stream or access through your Firestick or Android TV Box is hidden from the rest of the world.

If you ever need to stop the VPN service, simply re-launch the application and click the DISCONNECT button.
