PCStitch Pro has been designed by M&R Technology as a cross-stitch application intended for professional designers, stitchers and anyone who would like to extend his crafting creativity.

Key features.

The most powerful feature of this application is its ability to convert image into a pattern. For that, you only need to select the image and it does the rest. The output image can be sized as you like it and the colors can be mapped according to the available tones. It also lets you choose the number of colors and the type of floss to use. With PCStitch Pro you can also scan a photo. The interface is very intuitive and easy to use. With this application, the creation of stitched fonts is a child's play. The export capabilities are improved in this latest version and provide you with what you need to integrate your designs into other applications. It includes a library for your collections of cross-stitch.

Is It Free?

This is a free trial version. After it expires, you can purchase the full license for \$49.95.

My Favorite Free Cross Stitch Design Software:

The Cross Stitch Design Software that I liked the most during testing is KG-Chart LE . I have placed this software first in the list because of the features it offers. It comes with a number of hand embroidery stitches that make the designing process easy. Some of these embroidery stitches are Cross Stitch, Three Quarter Stitch, Quarter Stitch, Half Cross, and Petite Cross Stitch . You can comment on the design you have created in this software. You can also remove a particular stitch with the help of an eraser provided in the software.

KG-Chart LE.

KG-Chart LE is one of the best free cross stitch design software . Using this free cross stitch software, one can convert any image into an embroidery image in just a few steps. So, this is a good free image to cross stitch pattern converter. Just provide the image to be converted to cross stitch, and this will quickly do that.

Let's have a look on the features offered by this freeware:

This software comes in two different modes for creating a stitch pattern namely, Cross Stitch mode and Other Stitch mode . Each of these modes contain a number of stitch patterns that will make embroidery designing easy. In Cross Stitch mode, you will find five different types of Cross Stitch Patterns, namely, Cross Stitch, Three Quarter Stitch, Quarter Stitch, Half Cross, and Petite Cross Stitch . If you want to design a framed stitch pattern or fill stitched pattern of a particular shape, that option is also available in the software. Only two types of shapes are available in this software: rectangular and elliptical. If your design requires stitching patterns other than cross stitch design, Other Stitch mode is provided for that purpose. In this designing mode, you will find more than 15 stitching patterns. Some of these patterns are Back Stitch, Straight Stitch, French Knot, Four Sided Stitch, CutLine Stitch , etc. You can also add comments to your designed pattern. You can show or hide grid lines and symbols in an image. On clicking real view option, the software will show you the real pattern as designed on a fabric. You can also change the color of sheet and thread. This software can zoom in your design up to 10 times than that of the original. An eraser is provided in the software with the help of which you can erase any accidentally stitched pattern or simply you can use Undo button.

You can export your cross stitch design only in 8 different types of formats. These are Bitmap, JPEG, PNG, TIF, ICON, TGA, PGX, Jpeg-2000 . You cannot export your design in PDF format.
