Pokemon sacred gold free download full version.

Pokemon Gold PC Download is an emulated port of the second hit of the popular Pokemon series, one of Nintendo's major brands. The title is a twin version of Pokemon Silver and both games belong to the second generation of the series. The original was created in the GameFreak studio as a production for the Game Boy Color portable console, while the port was designed for the Windows PC platform.

The story presented in Pokemon Gold PC Download for Windows PC platform takes place three years after the events of Pokemon Red and

Pokemon Blue. Players embody another coach who starts their adventure in their hometown, where they tour the Johto region, meet new genres of title matches and face the best coaches in the area. Unlike the Pokemon HeartGold released in 2009, Pokemon Gold PC Download is a faithful port of the original production on Amiga Boya Color. As in 1999, the game introduces many new features to the first series.

At first fire comes the aforementioned new region inhabited not only by old acquaintances, but also by 100 previously unknown species in which the legendary Ho-Oh is the mascot of the title described. Pokemon Gold PC Download does not make any changes to the original release. So we have an old school Game Boy graphics, but instead of shades of gray with Pokemon Red and Pokemon Blue, we get a colorful visual setting.

The full version of Pokemon Gold PC Download is available for download with the PC Installer. The program allows us to download and install the game at the maximum speed of your internet connection.

How to download and install the full version of the game:

Pokemon Gold.

Gather all the second generation Pokemons in one of the best Pokemon RPG game! Battle gym leaders and capture the legendary Ho-oh in Pokemon Gold! Explore the Johto region and interact with the people of the land and start your Pokemon adventure.

Pokemon Gold (and the sister version Pokemon Silver) is critically acclaimed as one of the best Pokemon games of the entire Pokemon series. The game features second-generation Pokemons and evolutions, enhanced graphics, strategical turn-based combat, and a lot more. The game tracks real-world time, and changes accordingly! If you can't find a specific Pokemon during the time you are playing, try again at a later time! Pokemon Gold and Silver are identical games, however, the noticeable difference between the two is the Legendary Pokemon that can be captured. In Gold is the bird Pokemon Ho-Oh, while in Silver is the flying Pokemon Lugia.
