## Download and Install 1500+ Fonts for Samsung Devices [No Root]

Download 1200+ Fonts exclusively made for Samsung devices. You do not need root to install and use these fonts on your device and they are absolutely free!

Fonts are one of those things that you constantly look at, every single second that you are looking at your smartphone. In today's world, I am pretty sure people are looking at their phone for several hours every day. Honestly, it could get a little boring you look at the same fonts every single day. SamsungOne, the exclusive Samsung font is pretty neat, don't get me wrong. But given enough time, even that will become old and boring. That is why options to customize are always good. Well, how about 1200 choice of fonts? Yes, today we will tell you how you can download and install 1200+ fonts for Samsung devices without root access. All the latest devices such as Samsung Galaxy Note8, Galaxy S8, Galaxy S8+ and all the older devices running Android Nougat and above are supported. Read ahead to know more.

Fonts for Samsung Devices.

Like many other manufacturers, Samsung has also adapted to the trend and has introduced themes in its smartphones. You can change the look of the device completely. But the fonts available for Samsung devices are pretty limited and if I am not wrong, most of the good fonts are paid. Sad! Well, we will help you change that. With Wings Samsung Fonts, you have access to more than 1200 Samsung fonts and all of them are free. That's right, 1200+ FREE Samsung fonts. These are some of the best fonts you can find for Galaxy S8, Galaxy S8+, Galaxy Note8 and many other Samsung devices. Below are some screenshots:

Download 1200 Samsung Fonts for Samsung Devices.

There are two ways to get these free Samsung fonts your Samsung device. Both of them are listed below:

Method 1: Using Substratum [Recommended]

Download and install SamsungSans from Galaxy Apps: Download Download and install the Substratum Theme Engine: Download Download and install sungstratum addon for Substratum: Download If you want help in setting up substratum on your Samsung device, refer to this guide here: Guide to Install Substratum for Samsung Devices. Download and install the [latest] Wings Samsung Fonts.apk from here: Download. Note : There will be a version which says '968'; ignore that. Download the latest version of the APK file without the '968'. Open Substratum and install Font Packages. [You can install multiple fonts in one go!] Go to Settings > Display > Screen zoom & font. Choose whatever font you want and apply. Done! Read the note below.

Important Note : In the font-apply screen, the fonts will/may be listed twice. It is a known bug. One of the two fonts will not apply. In that case, simply choose the other one with the same name and it will apply!

Method 2: Without Substratum

This method is not recommended by the developer, but you could use this if you want.

Download and install SamsungSans from Galaxy Apps: Download Download and install the [latest] Wings Samsung 968 Fonts.apk from here: Download. Note : There will be a version which says '968'; download that. Download the latest version of the APK file with the '968'. Also, there will be two different versions – one for Android Oreo and the other for Android Nougat. Download accordingly. Go to Settings > Display > Screen zoom & font. Choose and apply the font you like! Done!

I've gone thru the steps both for oreo and nougat on my note 8 and STILL getting the font not supported message... It was working just fine and now it isnt ...

How to easily Install any Font on Samsung Galaxy devices? – Download Unlimited Fonts!

Samsung is known for its stunning customization options and the full featured TouchWiz firmware. The theme engine is the best thing about Samsung Galaxy devices; where only a handful smartphone manufacturer support Themes out of the box. You have to settle for overlay methods such as Substratum Theme Engine that requires root access and may be quite unstable at times. That is not the case here. Samsung supports themes, fonts, icons, AOD and Lock screen customization.

The Galaxy store has everything except the latest and free fonts. We have solution for that too. Here is the easiest way to install any font on your Samsung Galaxy devices. There are almost infinite number of fonts out there. You can download unlimited free fonts from the internet. Download any font and follow the instructions below to install fonts on Samsung.

Updated: There is a new tutorial on installing fonts for Samsung Galaxy devices running latest Android 9 Pie or One UI here. As we know, Samsung removed support for installing custom fonts on Galaxy S8 and Note 8 in new firmware updates. If you are still running Android 8.0/8.1 Oreo then continue using this tutorial.

You may also like:

Download Unlimited Fonts for Samsung Galaxy devices.

The internet has almost unlimited fonts collection. A simple Google search should get you started. However, for convenience, we are listing some font repositories for ease. The most popular Google Sans Font from Android 8.1 Oreo is also listed below.

Download Google Fonts for Samsung Galaxy devices.

Here is the new Google Sans or Product Sans from the the Pixel 2 Android 8.1 Oreo or later. Simply download the Google Fonts APK from below and install it normally. It works on all the Galaxy devices running official stock Nougat/Oreo/Pie firmware on S9, S9 Plus, Note 9, etc. Samsung S8/S8+/Note8 Pie Beta versions don't support custom fonts yet.

How to uninstall:

Download & Install GoogleSansFonts.apk (Box Mirror) Reboot device Go to Settings > Display > Font and screen zoom Choose your Font Select Apply.

How to uninstall:

Download & Install Uninstall Font.apk (Box Mirror) Go to Settings > Apps Uninstall "0 – Uninstall To Remove Font"

Download Google's Product Sans from Android 8.1 Oreo.

Google is known for bringing about new products to life. At first we had the Roboto font for Android OS. Now Google introduced its own font called Product Sans with Android 8.1 Oreo. This is one of the best looking font for any Android device. It is a must try.

Samsung Experience has its own font. So the Product Sans isn't listed in the font section. However, you can manually install Android's most popular Product Sans from Google font family onto Samsung Galaxy device.

Visit post Google Product Sans font for Samsung Galaxy device. Go to the download section and see the section mentioning Samsung Experience.

How to Install any font on Samsung Galaxy devices?

While you can use any font on your Samsung Galaxy device, for reference, we are using the Product Sans font in this tutorial. Follow the same steps if you want it. All you need is your favorite font file in Truetype font format (.ttf).

How to Download & Install Fonts on Samsung Galaxy Devices (Any Font)

Samsung Galaxy devices have an ability to customize to modify the user interface whether it is a font, wallpapers, themes, icon, or customization in the lock screen. Both the TouchWiz and the new One UI comes with an option to change the theme or other customizations manually. One of the best things about the Samsung Galaxy devices is, you may don't need the root access. And if you want to change the font on your phone, here's the step by step guide to install any font on Samsung Galaxy devices .

Recently, Samsung adds an option to download the paid and free fonts directly from the Galaxy Store. It is an easy way to install any font on the device, but there are very few free fonts available in the store. Fortunately, there's an option to manually download and install the fonts from other apps as well. So, follow the below-listed instructions to install fonts on any Samsung Galaxy smartphone.

Download any Font for Samsung Galaxy Devices.

There are numerous fonts available on the web, you can simply search the font name in the Galaxy store. If it is not available then, you can search on the web and download the font. Make sure the font is in Truetype font (.ttf). So, download the fonts from below apps or websites.

iFont – Download FontFix – Download theme Galaxy – Download GxFonts – Download Google Fonts – Website.

Download Google Fonts for Samsung Galaxy Devices.

Download Galaxy S8/Note8 Font for All Devices [SamsungOne]

Download Samsung Galaxy S8/Note 8 SamsungOne Font for all Android devices. Samsung has taken a different and a better road in terms of design language recently. We have been seeing drastic improvements in terms of Samsung software experience in their latest devices. Samsung devices are infamously known for their slow software even their hardware is always top notch. There is something about the Touchwiz which always seemed to drag down the whole Samsung experience. But thanks to their latest design route, the experience is a whole lot better. One of many such design changes is the SamsungOne font which Samsung is planning to use on all its future devices. Now, we have SamsungOne font which is used in Samsung Galaxy S8 and Galaxy Note 8, available to be installed on all Android devices! All credits go to the XDA Developer Forum Member v-b-n.

SamsungOne Galaxy S8/Note8 Font.

The SamsungOne Font is one of the many design improvements that Samsung is bringing to its software experience. The font will replace the default Roboto font that comes as default with Android. The font looks more fresh and clean with subtle changes. Take a look at the font below:

We also have two different modded version of the font, which you can see below:

Download SamsungOne Galaxy S8/Note8 Font for All Android devices.

You can download the Galaxy S8 Font and Galaxy Note 8 Font that is compatible with all devices by clicking below:
