Still can't find it? Simply fill out your email address used when you purchased Mailbird Personal or Business on the left, we'll resend it to your inbox right away!

How to save email offline in Mailbird.

You can save emails to your computer by saving them to a .eml format. This is done by selecting the message in Mailbird and open the additional options by clicking on the small downward pointing triangle in the message's header on the right.

-Click on 'Message source'. Now save this as a file locally on your computer.

Another option is saving email as PDF. To perform this action, click "Print" on selected email and then choose "Print to PDF".

Alternatively you can ask your email provider if they provide any kind of a back up tool, or use a 3rd party service like.

Google Takeout for Gmail.

Also, if you are using Gmail, there are a number of Chrome extensions (like the aptly named Save Emails to PDF) that allow you to export, download, or print your messages as PDFs, including multiple emails at a time.

Mailbird.

Mailbird is a desktop email client for Windows designed to help you manage all your accounts and inboxes from a single interface. From the application's options, you can also customize the client's appearance with various themes.

To start using Mailbird, first you have to link at least one email account. It may take a few minutes before the application syncs all your emails. By default, you'll receive desktop notifications when you receive an email, but you can also turn this feature off from the options menu.

Mailbird is a powerful email client for Windows. It's a great alternative to Thunderbird and other well-known clients. This application includes keyboard shortcuts, integration with other programs, multilingual support, and more, all on an elegant and easy-to-use interface. What more could you ask for?

Softonic in:

The name and logo of Softonic are registered trademarks of SOFTONIC INTERNATIONAL S.A. Copyright SOFTONIC INTERNATIONAL S.A. © 1997-2021 - All rights reserved.

In Softonic we scan all the files hosted on our platform to assess and avoid any potential harm for your device. Our team performs checks each time a new file is uploaded and periodically reviews files to confirm or update their status. This comprehensive process allows us to set a status for any downloadable file as follows:

It's extremely likely that this software program is clean.

What does this mean?

We have scanned the file and URLs associated with this software program in more than 50 of the world's leading antivirus services; no possible threat has been detected.

This software program is potentially malicious or may contain unwanted bundled software.

Why is the software program still available?

Based on our scan system, we have determined that these flags are possibly false positives .

What is a false positive?

It means a benign program is wrongfully flagged as malicious due to an overly broad detection signature or algorithm used in an antivirus program

It's highly probable this software program is malicious or contains unwanted bundled software.

Why is this software program no longer available in our Catalog?

Based on our scan system, we have determined that these flags are likely to be real positives.

We'd like to highlight that from time to time, we may miss a potentially malicious software program. To continue promising you a malware-free catalog of programs and apps, our team has integrated a Report Software feature in every catalog page that loops your feedback back to us.

Flag any particular issues you may encounter and Softonic will address those concerns as soon as possible.
