If you're looking for a professional application to perform multimedia conversions between formats, you can try out Tunebite, an application developed by Audials, a well-known company that develops music software. This application includes really interesting options that make it one of the best in its field.

A multipurpose tool to convert file formats.

This software allows you to record music files protected with DRM, audiobooks and videos while it plays any file. Moreover, it's possible to convert the multimedia files with DRM to other formats that don't have the anti-copy protection like MP3, WMA, OGG or WAV and WMV or MPEG4 in the case of videos.

A converter compatible with dozens of formats.

To show its integration with social networks, it's capable of downloading and storing videos from YouTube, Yahoo, Facebook, MySpace, ClipFish and MyVideo in the format of our choice, a really interesting function, especially with Tunebite's capacity to synchronize with various multimedia players.

The application's interface is somewhat complex to begin with, but it should only take the majority of users a couple of minutes to realize that the organization of all the options isn't at all chaotic, and that everything can be accessed in a couple of clicks.

Tunebite.

Tunebite is a video conversion tool to get around the protection that some discs have which under normal conditions won't let you copy the content to your computer.

The copied videos can be converted into any of the following formats: WMV, AVI, MP4, and 3GP. In addition, you can choose from a wide range of codecs and configure them according to your preferences.

Another interesting thing about Tunebite is that it lets you record videos directly from the Internet. To do this you need to install an additional complement, but once that's done it's just as simple as copying a video.

Tunebite is an interesting application for users who have a lot of music and movies that are protected by DRM (digital rights management), and who want to enjoy their collection anywhere and at anytime.
