With AVG Anti-Virus, you get hassle-free protection against today's most sophisticated threats, online and offline. AVG Anti-Virus includes our unique LinkScanner to prevent you from accidentally visiting harmful sites. It's faster, smarter security that won't slow you down.

AVG Antivirus is one of the most complete programs we have found to date. It includes many new options to make it one of the most effective virus scanners on the market. It is still plagued by horrible slowdowns at times. Even things so simple as just typing an IM can be stopped for several seconds for some reason. If you can get passed the occasional slowdowns of your computer, the scanning functionality of AVG Antivirus is top of the line. With the rewrite of the scanning engine, AVG includes multi-processor support.

Frequently Asked Questions.

What are the advantages of using a driver updater?

Drivers are essential bits of software that allow your computer to function properly. Updating your drivers is one of the best ways to optimize your PC and avoid many common performance issues.

Outdated drivers can slow down your PC and cause crashes, freezes, and other problems. Updated drivers can boost FPS when gaming and improve audio and visual quality. Older drivers may become vulnerable to malware, zero-day attacks, and other computer exploits.

AVG Driver Updater automatically scans your PC to detect outdated and malfunctioning drivers, then updates them to give you the most current versions and keep your PC performing at its best. Try it today with a free trial.

What features are included in AVG Driver Updater?

AVG Driver Updater is an automatic driver updater capable of scanning your PC to detect outdated and malfunctioning drivers, then updating them to ensure that you always have the most current drivers. With a massive library of drivers from over 1,300 hardware brands, AVG Driver Updater will automatically source new drivers for all the hardware in your PC. And since it's coming from one of the most well-known and trusted names in the cybersecurity world, you can be confident that AVG Driver Updater is both safe and reliable.

Why is AVG Driver Updater safe to use?

By automatically sourcing driver updates and verifying them before installing, AVG Driver Updater ensures that you're getting only the official and most current drivers for your hardware. When you update your drivers manually, you aren't getting these same authenticity checks. AVG Driver Updater takes all the guesswork out of updating your audio drivers or fixing your graphics drivers, and even includes a rollback feature in case a newer driver causes more problems than the older one did.

How can I tell if my drivers are out of date?

AVG Driver Updater will automatically scan your PC to detect any outdated drivers. If you haven't installed it yet, here's how to check for outdated drivers and update them yourself:

Type the phrase "device manager" into your Windows search box, then select Device Manager from the results. In the Device Manager window, open the drop-down menus next to a device category, such as Audio inputs and outputs. Right-click on one of the devices, then click Properties. In the following pop-up window, click on the Driver tab, then click Update Driver. Follow the instructions in the wizard.

Sometimes, Windows won't be able to locate the latest drivers for your hardware, and you'll need to download them directly from the manufacturers of the hardware in your PC. Either way, when you let AVG Driver Updater take care of all this for you, you'll never have to worry about hunting down drivers for your PC.

Can I try AVG Driver Updater for free?

Yes! With a free trial, you can try AVG Driver Updater on your PC and find out just how easy it is to let our premium software automatically update all the drivers on your PC in real time. Download your free trial now.

Protect every part of your online life.

AVG Internet Security blocks viruses and malware, keeps your emails secure, protects your personal files, passwords, and webcam from hackers, and lets you shop and bank online without worry.

Web & Email Protection.

Hacker Attacks Protection.

Our first line of defense for your PC.

Advanced Antivirus - Scans your PC for viruses, ransomware, spyware, and other types of malware.

Behavior Shield - Sends alerts if suspicious software behavior is detected on your PC.

AI Detection - Proactively identifies malware samples to protect you from new threats.

CyberCapture - Blocks new threats by having our antivirus software automatically upload them for analysis.

PUA Scanner - Identifies potentially unwanted apps that you may have unknowingly downloaded.

Turbo Scan - Shortens scanning time by skipping files it already knows are safe.

Real-Time Updates - Ensures you're always protected by getting security updates, bug fixes, and new features automatically.

Do Not Disturb Mode - Temporarily stops all pop-ups and app notifications so you can focus on what you're doing.

Silent Mode - Postpones AVG scans, updates, and popups so you can avoid interruptions while you work.

Ransomware Protection - Wall off your personal files and photos so hackers can't lock them and control which apps can change or delete them.

The safest way to connect.

Stay safe when you go online by scanning links, downloads, and email attachments for threats and avoiding unsecure Wi-Fi networks.

Link Scanner - Avoid dangerous websites by scanning links for anything suspicious.

Web Shield - Check files for hidden malware before downloading them onto your computer.

Email Shield - Block dangerous email attachments to avoid falling victim to phishing attacks.

Wi-Fi Guard - Get alerted if you connect to an unsecure Wi-Fi network.

Toolbar Remover - Remove unwanted or potentially malicious browser toolbars and extensions.

Keep hackers out.

Control what goes in and out of your computer, stop hackers from accessing your device remotely, and secure all your passwords.

Enhanced Firewall - Stop hackers from accessing your private files and photos with our firewall.

Remote Access Shield - Shield your device so hackers can't take control of it remotely.

Password Protection - Prevent "blocked apps" from reading, changing, or deleting passwords saved in your browsers.

Stop snoops from spying on you.

Prevent your webcam from being compromised and delete old data safely and permanently.

Webcam Protection - Protect against webcam hacking by forcing untrusted apps to request permission to use your webcam.

Data Shredder - Securely and permanently delete files and data to prevent unintended or unauthorized recovery.

Shop and bank online freely and securely.

Get additional layers of online security so your sensitive information doesn't fall into the wrong hands.

Fake Website Shield - Avoid fake websites by automatically being redirected to a real website if you accidentally land on one.

Protect your entire family.

Cover up to 10 devices with a single subscription so you can easily protect every device your family uses.

Mobile security included.

AVG Internet Security also protects your Android, tablet, iPhone, and iPad. Stay safe online, lock your private apps and photos, find your phone if it gets lost, and keep thieves away from your personal data.

World-class protection.

We've won hundreds of awards since we began in 1991, and over 25 in the last two years alone. With top marks for "real world" protection and performance, you know you're in safe hands.

AVG Antivirus Free.

While most Antivirus vendors all seem to promise the same things, namely high security, fast scanning speeds and high performance, AVG Antivirus's latest updates seem to breath some truth into that line. AVG Antivirus Free seems to do everything a little bit quick like scanning, removing threats, installing and keeping the system quick.

The interface of AVG Antivirus Free is simple and easy to navigate. The icons are easy to recognize and the toolbar is a useful, opt-out feature it offers. A new quick fix, button makes AVG hassle-free. The new interface resembles older looks. AVG Antivirus is connected to cloud computing and user experience is added to the data they collect, but it's also out-out like the toolbar.

The new AVG LinkScanner is a useful and free separate download which scans links posted on MySpace and Facebook to make sure you're not affected by malicious javascript sometimes found on those pages.

AVG Antivirus Free Edition features rootkit protection, adware and scamware protection and also features a gadget installable on Windows desktops. Also found within AVG's newest suite of PC protection tools is a registry scanner and broken shortcut remover bundled in its PC Analyzer.

Even though AVG Antivirus offers a tier of products, the free version offers ultimate protection with no costs and no extra price-tags. It doesn't even like to nag you!
