Nero Burning ROM.

Nero Burning Rom is one of the leading software solutions for burning CD, DVD and Blu-ray discs and disc images.

Nero Burning Rom, often just called Nero, is a Windows solution for burning CDs, DVDs and Blu-rays. It also supports specialized CD formats, such as VCD and SVCD. You can use Nero to burn a disc image to a disc, or you can simply burn a file structure, and the software will automatically organize it in the appropriate format for the medium in question.

Nero also supports the ripping of images from a disc to an ISO or other disc image format. The software can copy from one disc to another, but if you don't have two optical drives with write capabilities, you can rip one disc to file and then write that file to another disc. Another advantage of being able to rip disc images is that you can store those images in digital format. Nero even supports mounting of these digital images via virtual drives. Your machine can host any number of virtual drives, and if Nero is set to load at startup, those drives can be automatically available to you as physical drives would.

This suite of tools also has an impressive selection of formats available to it by default. Supported audio formats include AAC, MP3, OGG and WMA. Supported video formats include AVI, MP4, MOV and VOB. You can also enhance this support with codecs installed on your machine. Nero also supports disc protection measures, such as SecurDisc. These can be ripped as part of a disc image, and then, SecurDisc can be emulated when the image is mounted. This provides you the option of making and using backups of your copyrighted software so that you can protect the original discs.

The burn quality of both physical and digital images is impeccable. Most experts agree that Nero is one of the best burning solutions available. The process is very stable, and Nero achieves its high-quality even at fast burn speeds. Something else than can be said for Nero Burning Rom is that it gets the most out of CD, DVD and Blu-ray writing equipment, which is something many alternatives cannot claim.

If there's a downside to Nero, it's that the user interface can seem overwhelming to new users. This isn't an application that strives for user-friendliness but rather intends to be a professional solution. That does increase the learning curve but also provides significant benefits to advanced users and even casual users who take the time to learn their way around the suite.

Software » All In One BD » Nero 2021 23.0.1000.

Nero is THE software when it comes to burning CDs, DVDs, Blu-ray Discs. Fast and easy rip, burn, Autobackup, and copy functions, Backup files to CDs, DVDs, and Blu-ray Discs, Create professional-looking DVD movies with integrated 3D menus, Copy, burn, share, upload, and create music mixes like a DJ, Convert music, photos, and DVDs to play on your iPod and other mobile devices, Quick photo and video upload to My Nero, You-Tube, and MySpace, Watch, record, pause, and customize your live TV experience, Play Blu-ray, AVCHD and other HD formats.

Nero video is not made for ripping blu ray.

I'm trying to author a blu ray using nero video with multiple subtitle tracks (importing m2ts with video audio and multiple subtitle streams), but subtitles are not supported! TERRIBLE FOR PAID SOFTWARE! I believe the only way to have subtitles is to encode them with nero recode (burn in). I will definitely go back to free MultiAVCHD, atleast it converts almost any subtitle format to pgs, has named chapters support, only has problems with TrueHD audio.

I agree with the previous poster, qz3fwd; Nero AG no longer sells software that will directly play a Blu-Ray disc in a Blu-Ray drive in a computer. I encountered this firsthand as I described here on Nero AG's forum: [http://forum.nero.com/nero\\_eng/topics/purchased-i](http://forum.nero.com/nero_eng/topics/purchased-i).

What adds insult to injury is that if you attempt to view a Blu-Ray disc with Nero Essentials or MediaHome the software launches an advert that says,

"Want to enjoy your high definition movies from Blu-ray discs?"

Nero Blu-ray Player enables you to playback Blu-ray and AVCHD discs in razor-sharp clarity and optimized HD Audio and Dolby (R) surround quality. It also supports additional streaming content on BD Live discs.

To access Blu-ray playback functionality in Nero Blu-ray Player a purchase is required. Click the "Info" button to find our offer."

"The feature you are trying to access is not available in your product.

Click the "Info" button to find our offer."

With both ads after clicking the "Info" button one is redirected via weblink to purchase "Nero 2016 Platinum". This is despite the fact that none of Nero's current software offerings have Blu-Ray disc player functions. In my personal opinion; this is not only misleading, but also deceptive and fraudulent advertising. Despite that this situation has been reported on Nero AG's own forums on multiple occasions, they still haven't taken any substantive action correct the misleading web link redirects.

Nero 2016 DOES NOT include the Blu Ray player application anymore and it is not obviously stated anywhere!

That is why I voted the suite at an overall score of 5.

Nero 2017 Platinum.

This powerful video editing suite could benefit from a more unified interface.

By Jackie Dove 02 May 2017.

Our Verdict.

Nero is a powerful video editing suite, but its odd interface, inflexibility and lack of popular features make it a less-than-optimal choice.

Emphasis on security for disc burning Extensive library of transitions and effects Modular setup lets you use only the functions you need Ties into mobile apps featuring Wi-Fi transfer and help files.

Against.

Odd interface with separate modules No motion tracking, multicam or 360-degree camera editing Can't export for specific mobile device playback Can't switch back and forth between Express and Advanced Editing modes.

Nero 2017 Platinum — a multimedia suite for editing, burning, converting and playing audio and video — comprises 15 apps and services under one roof. It lets you quickly compose, edit and export movies to CD, DVD, Blu-ray or the web. Nero offers deep functionality, but its inflexibility and somewhat disjointed presentation can be distracting.

Interface.

The 2017 version of Nero sports a redesigned Start screen and QuickStart feature that propels you right to the heart of editing your videos. Nero's MediaHome and MediaBrowser modules gather all of your device assets in one place, making metadata and playback available in a clear, unambiguous, discrete layout.

The first time you launch Nero, the app displays the full spectrum of its functionality in five areas: Manage & Play, Edit & Convert, Rip & Burn, Backup & Rescue, and Extras. It's clear, but not elegant.

The abundance of modules on the launch page is a bit overwhelming. I found it easier to use the Windows application menu to choose the modules I wanted to launch rather than selecting from the launch menu. Although the modules can work together, they are all in separate windows.

Within the editing interface, two modes — Express Editing and Advanced Editing — give you a choice between timeline and storyboard styles. Both look crisp and clear. You can build a project in Express Editing mode and switch to Advanced Editing for more fine-tuning, but once you start editing in the advanced module, you cannot switch back. In contrast, more flexible storyboard features in Corel VideoStudio, CyberLink PowerDirector and Premiere Elements' Quick mode do allow you to switch back.

Nero includes plenty of transitions and effects, but unlike in Premiere Elements and other video editing software, you cannot search for them. Rather, you must choose from the list and designate favorites to find them easily the next time you want them. The Effects menu is partly hidden at first, and in close proximity to the My Media palette, so you need to click on it to see all of the multimedia effects, which are arranged neatly by type.

Features.

MediaHome lets you identify people in your footage and pinpoint places where the video was shot. However, the automatic location function did not work especially well in my testing; in some cases, it indicated the wrong locations, and in others, it didn't identify a location at all. However, you can easily use the built-in map to add or correct locations. The MediaHome browser also picked up a lot of irrelevant image files, but it was easy to delete them from the library.

As with some of its more advanced competitors, such as Corel VideoStudio and CyberLink PowerDirector, Nero works with a range of formats, including HEVC (H.265) and 4K videos from smartphones, digital cameras and camcorders. The video module's Express and Advanced modes facilitate numerous effects and transitions on the timeline. Stylish menus are available for DVDs and Blu-ray discs, and you can design CD sleeves with Nero's Cover Designer.

A new multi-export feature, based on scene detection, works in the Express Editing mode to deliver short movie clip highlights derived from longer footage. From those short takes, you can choose the ones you want and use the multi-export batch function to save and share them.

The Nero MediaHome WiFi Sync app lets you exchange files between iOS or Android smartphones or tablets and your desktop. It worked fine once I properly bypassed my Windows firewall controls.

The new KnowHow interactive learning guide assists users with Nero's extensive functions, offering tips and tricks in the form of short video tutorials, manuals, FAQs and a glossary. In Windows 10, you can access it directly from the application or the Start menu, or use it on your smartphone or tablet (iOS, Android, or Windows 10 Phone).

The app includes background audio clips, features new Gracenote support for embedded album cover art, and lets you replace audio from your video clips and apply noise reduction and various audio effects. The new SecurDisc 4.0 tech provides password protection and 256-bit encryption for disc burning.

Performance.

I tested Nero on an HP Spectre x360 laptop running Windows 10 Home. Its 64-bit Intel Core i5-5200U processor runs at 2.2 GHz on an Intel HD Graphics 5500 system with 8GB of RAM. I combined five clips into a 2.5-minute video shot at 60 frames per second and rendered the projects to MPEG 4 at 720p. We timed rendering at both 60 fps and 30 fps.

Export speeds landed on the low end of the pack for both 30 fps and 60 fps, at 4:06 and 6:43, respectively. The overall top-ranked CyberLink PowerDirector 15 Ultra scored 1:58 at 30 fps and 3:07 at 60 fps. Nero also crashed occasionally — and was the only one of the video apps I tested to do so — but reinstalling the program seemed to fix the stability issues.

Sharing.

Nero offers a respectable assortment of video export formats, in addition to DVD, AVCHD and Blu-ray — and you can output audio separately. The web export feature saves your video for online venues, and if you choose that option, Nero gives you a direct menu to upload to YouTube. But there are no specific output presets for other popular sites, like Facebook or Vimeo; competitors such as Premiere Elements, CyberLink PowerDirector and VideoPad do provide these options.

Versions.

Nero comes in Classic and Platinum versions, with the latter offering all of the features of the former but adding 4K playback, video editing, and HEVC (H.265, High Efficiency Video Coding) support. The Platinum version packs 300 additional effects, video filters and templates, plus 42 4K-optimized templates that you can use to automatically create movies or slideshows. It also features picture-in-picture, chroma keying, slow motion, time lapse, tilt-shift and other common special effects. Nero 2017 Platinum offers a Music Recorder, which requires a separate installation, that lets you record MP3s from internet radio stations for free.

Bottom line.

While the modules are fairly well organized and neatly arranged, and the Wi-Fi syncing app is useful, there remains something uninspiring and challenging about Nero. The software's multitude of modules offer all the basics in terms of functionality — and there's some clever use of mobile apps added to the mix — but the execution of these many features has flaws. Enhanced flexibility and interface integration, as in CyberLink's

PowerDirector 15 Ultra or Corel VideoStudio Ultimate X10, would be an improvement. Some video editors are fun to use, but that is not quite the experience I had with Nero.

Download free nero 2017 trial version.

All files are in their original form. LO4D.com does not modify or wrap any file with download managers, custom installers or third party adware.

This download is of NeroInstaller and was signed by Nero AG with an on-disk file size of 3270440 Bytes. It's distributed as Nero2019-1.13.0.1\_stub\_trial.exe.

About Nero.

Nero 2019.1.13.0.1 12 is a multimedia package which includes the popular Nero Burning Rom. Originally just specializing in burning optical discs, Nero now includes things like video editing, burning and backing up. With the release of Nero 12 also comes support for Windows 8, including support for previous versions of Windows. This download is licensed as freeware for the Windows (32-bit and 64-bit) operating system/platform with certain restrictions based on its EULA. Nero is available to all software users as a free download for Windows.

Is Nero safe to download?

We tested the file Nero2019-1.13.0.1\_stub\_trial.exe with 24 antivirus programs and it turned out 100% clean. It's good practice to test any downloads from the Internet with trustworthy antivirus software.

Does Nero work on my version of Windows?

Older versions of Windows often have trouble running modern software and thus Nero may run into errors if you're running something like Windows XP. Conversely, much older software that hasn't been updated in years may run into errors while running on newer operating systems like Windows 10. You can always try running older programs in compatibility mode .

What versions of Nero are available?

The current version of Nero is 2019.1.13.0.1 and is the latest version since we last checked. This is the full offline installer setup file for PC. This site has hosted other versions of it in the past such as 2019.1.12.0.0, 2018.1.10.0.9, 2017.1.10.0.6, 2017 and 2016. At the moment, only the latest version is available.

What type of file formats are supported?

The program currently supports over 5 video formats including DVD, EVO, FLAC, MP4 and OGG.

Nero Platinum Suite 2021 v23.0.1010 Full Version.

Nero Platinum Suite 2021 v23.0.1010 Full Version merupakan aplikasi terbaik yang dapat anda gunakan untuk burning dvd atau cd dan juga segala keperluan multimedia lainnya. Semua kebutuhan multimedia anda dapat terpenuhi dengan baik menggunakan program yang satu ini. Nero Platinum 2021 Full ini dilengkapi dengan fitur-fitur yang sangat lengkap untuk file multimedia anda. Anda dapat mengedit video, memutar video, burning cd/dvd, mengkonversi file multimedia, memotong video, menggabungkan video, RIP video, Ultra HD (4D) video editing, dan banyak lagi lainnya.

Disini kami membagikan Nero Platinum 2021 Full ini dalam bentuk preactivated, jadi anda tidak perlu menggunakan patch ataupun keygen untuk membuat aplikasi ini menjadi software full version. Jadi anda dapat menikmati semua fitur dari aplikasi Nero Platinum 2021 Full ini tanpa terkendala keterbatasan fitur dalam versi trialnya. Yang perlu anda lakukan hanyalah menjalankan file setup dari program ini dan setelah proses instalasi selesai, maka anda akan langsung mendapatkan Nero Platinum 2021 Full Version.
