

how to download music on android from computer

How to Transfer Music from Android Devices to Computer.

Music has been playing a great role in our daily life, almost everybody enjoy wonderful music wherever they are and whatever they do. According to statistics, Taylor Swift, The country-turned-pop star, raked in \$170m from June 2015 to June 2016, crowned world's top-earning artist in Forbes' celebrity rich list of 2016, which reflected that how people love music worldwide (actually, last year's highest-paid was also a musician, Katy Perry, who banked \$135m in 2015, according to Forbes).

As we all know, nowadays, we mostly listen to music on our cell phones or an iPad, of course, sometimes on our computer, so it's incredible for us to sync music from our cell phones to computer. There are many kinds of Android devices, as well as many major computer operating systems. Some phones try to make syncing simple, by automatically prompting you to choose what kind of files you're trying to send; sometimes it works, and sometimes such steps make the process even more confusing. As an old user of Android and a fanatic music lover, I'd like to narrow down your pain to endure when transferring music from Android device.

Method 1: Transfer music from Android to computer by using USB cable.

This method could be very primary and may not be cool. And sometimes it takes long time to find the location of your music if you're not familiar with your folder in your device, that's why this method seems to be a little complicated and may not be a effective way.

Step 1: Connect your Android device to computer via USB cable, and your computer will recognize it as a removable USB drive.

Step 2: Drag down Notifications panel from the top of your phone's screen, connect as "Media device(MTP)". Click "ok" when the "Allow USB debugging" pop out.

Step 3: Ensure the drive installed succeseefully on your computer. Open the Portable Devices and find "music" (some devices may not the same folder).

Step 4: Select and copy the music what you want to transfer from your Android to your computer.

Method 2: Sync your Android music to computer via Syncios Mobile Manager.

Syncios Mobile Manager is a convenient and helpful application, which makes it easy to help you sync all types of files to your computer from your Android phone. The best advantage of this approach is that with a visual panel, where you are able to preview, edit, manage all your contents on your device, tips as follows:

Step 1 Download and install Syncios Toolkit on your computer and run it. And click into 'Mobile Manager' on Syncios Toolkit interface to intiate the Syncios Mobile Manager. If you are on Mac computer, directly click the download button to get into it.

Step 2 Click on "Music" button on the top menu in program homepage.

Step 3 Select the music which you'd like to transfer to your computer, by ticking off the box in front of the title selectively.

Step 4 Click on "Export" button and choose your backup path on PC according to the what prompts instruct.

Method 3: Transfer all music from Android to PC simply on one click.

The final method could be the easiest and the best way to transfer your music to computer, since Syncios Data Transfer can simply by ONE CLICK to backup all music from your Android device to computer. What's more, it enables you to restore iTunes music to your devices as well, worth a try!

Step 1 Click the download button provided below to get a Syncios Toolkit onto your computer. And then click into 'Phone Transfer' mode on the interface to initiate the Syncios Data Transfer.

Step 2 Select "Backup" from the homepage.

Step 3 Tick off "Audio" on the checkbox, then click on "Next" button, before long, all your music will be transferred to the computer successfully.

The program currently is available for both Windows and Mac system. Simply download and have a try on.

Conclusion.

Above are 3 useful methods to backup Android music to computer. You can use the most commom way, move music from Android to computer by manual, or use Syncios to 1-click transfer all songs or select certain audio files to computer. Choose the one you like.

How to Transfer Music from Google Play to Android Phones.

Do you love Google Play Music but want to listen offline? Or do you have the puzzle about "how do I transfer music from Google Play to my phone "?

Google provides an easy way to transfer the music and videos from your computer to Android Phone – Google Play Music. Back in 2011, Google released music streaming service Google Play music. At first, the sign up option was available only for the invites and users could only upload to the music to listen. Later on, like other music streaming services, Google introduced the paid service which allows users to listen the tracks while they are online from the Android Phone, Web browser from their computer or iOS App on iPhone and iPad. Google Play music now let you upload thousands of the songs which can be retrieved on any device with the Google Play music app. Here’s how you can use this service to transfer music from computer to Android Phone .

Part 1. Step by Step Guide to Transfer Music from Google Play to Android Phones Part 2. Best Google Play Alternative – iMusic to Move Music from Google Play to Phone.

Part 1. Step by Step Guide to Transfer Music from Google Play to Android Phones.

Step 1. Before you continue, make sure that Google Play music service is available in your country. Moreover, you will also need a Google Play music account to perform this job successfully. If you have already made an account to the Google Play Music, Click Here to open the service on your computer. This page will redirect you to the main page of Google Play Music. Click on the three lines on the left side of the screen to reveal the main panel on Google Play Music.

Step 2. Now, go to the bottom of this panel till you see the “Upload Music” option and click on this option. On the next windows, you can either drag and drop the music or can click on the “Select from your Computer” to upload tracks from your computer. Select different tracks that you want to upload and click on the “Open” button. Now, click on the “Continue” on the next screen. You will also need to install Google Play music extension to the Google Chrome browser on your computer to complete the upload the process.

Step 3. After completing the uploading, go to Play Store on your Android Phone and search for “Google Play Music” and install this application. Launch this application on your phone and herein this application, you will find the recently uploaded tracks to your Google Play Music account.

Note: Go ahead to know more detailed information about how to transfer google play music to new phone .

Advantages and Disadvantages of Transferring Music from Google Play to Android Phone:

*Advantages: One of the main benefit of using Google Play music is that you will not need a USB cable to complete the transfer the songs to your Android Phone. Moreover, once the songs are uploaded to the Google Play Music, you can listen to them on different devices at the same time. So, technically, you will have to upload the songs once and can play them on different devices with the same Google account.

*Disadvantages: On the other hand, you will need to have an active internet connection on your computer to complete the transfer process and you will also need Wi-Fi or data plan on your Android Phone to listen these songs. Another disadvantage of using Google Play Music is that it will not automatically update the artwork and missing ID3 Tags of your songs. Some users will also find it very difficult to use because the user interface of the software is not simple as it seems. Alternatively, you can use iMusic to transfer Music from your computer, iPhone, iPod and even iTunes

Library.

Part 2. Best Google Play Alternative – iMusic to Move Music from Google Play to Phone.

iMusic is a complete downloader, transfer and music managing tool for both Android and ios users.
