Free embroidery patterns to download for brother innovis.

Due to the unusually high demand for sewing machines and related equipment, many items are now only available by pre-ordering. If you are seeing this message, the product you are viewing is currently one such item. We are leaving it available to purchase, as pre-ordering is the only way to secure the product, when they are mostly being pre-sold before arriving in the country. Pre-ordering an item essentially places you in a queue and the product will be supplied to you, in rotation, as soon as it becomes available.

Manufacturer's delivery schedules are vague at best and changing on a daily basis. Updating this information on the website is no longer possible. It will of course be possible for you to cancel any order at any time prior to dispatch, if the wait becomes too inconvenient. If you would prefer to leave a deposit on this model, please contact us via the contact page and we will advise how to do this.

The Innov- is 4000D is quite simply the most innovative sewing and embroidery machine ever. Sew or embroider at speeds up to 1,000 stitches per minute on one of the largest embroidery fields in the industry (nearly 12 x 7 inches) plus the world's first triple lighting system for ideal illumination of the working area. Choose from a large selection of embroidery designs, which cover every style including classic, romantic, modern and so much more. Simply touch the oversized color LCD screen to select embroidery patterns, stitches, powerful editing feature tutorials and more. Other special features include: * Automatic push button threading system * Convenient thread trimming function automatically cuts excess thread between jump stitches. * Dual USB ports for connecting to your computer or optional media storage devices. * Presser foot height selector lets you select the presser foot height from three different levels. * Thread wiper system pulls thread tail out of the way of embroidery area. * 134 built-in Disney designs & 306 decorative stitches. When it comes to value in a high-end computerized embroidery-sewing machine, you won't want to overlook the Brother Innovis 4000D. Although an expensive machine, this model packs in some convenience features you won't find on every other machine in this price range.

Most impressive is the self-threading system. At this writing, the Innovis 4000D is the only top-of-the-line sewing-embroidery machine with this feature. If you're having trouble seeing to thread or are a beginner who wants to go immediately to beautiful embroidery without much of a learning curve, this feature may be exactly what you're looking for. To thread this machine, it only takes the push of a button.

PC-savvy seamstresses will appreciate the technical versatility of Brother's Innovis. This machine offers two USB ports in place of the usual one, so you can connect to more than one computer or storage device at a time. Those moving up from other machines will like the ability to use many of the designs they have previously stored in other formats.

Unlike some similarly priced machines, the Innovis 4000D includes a pivoting foot that can be used at three different heights. Other machines offer this feature, but usually only as an expensive upgrade.

If your embroidery plans include making projects for kids, you may want to consider this or another Brother machine. Brother is the only manufacturer that offers built-in Disney designs.
