

download windows 10 1803 iso files (64-bit and 32-bit)

Windows 10 May 2020 Update Is Live! Direct Download Version 2004 ISO Files (32-bit / 64-bit)

Windows 10 May 2020 Update is finally here! Microsoft began testing this version of the operating system well over a year ago, in February 2019. After a super long testing process, the May 2020 Update, version 2004, is going live for the public. Like the previous versions, this would be a phased out rollout, meaning not everyone would get it at the same time. However, through the ISO files, you can force and clean install Windows 10 2004 on your devices without waiting for the official notification.

We had already shared with you the steps to install May 2020 Update ahead of the pack, but now that the official Windows 10 ISO files are out, you don't have to go through any tedious processes.

Direct download Windows 10 2004 ISO files (64-bit and 32-bit)

Microsoft has released the Windows 10 2004 ISO files, which are now available for download. Here are the links (valid for both Home and Pro) to download Windows 10 May 2020 Update:

For languages other than English, head over to Microsoft. As these links will expire soon (9/30/2020 2:41:20 PM UTC), follow the instructions below to easily download Windows 10 2004, May 2020 Update ISO (HOME and PRO) for your devices:

Head over to the official download site [click this link]. Under Select edition drop-down, click on Windows 10 under May 2020 Update and hit Confirm. [There will be only one Windows 10 option since this works for both Pro and Home editions] Under Select the product language, choose your language > Confirm. You will now see two tabs to download either the 32-bit or the 64-bit Windows 10 May 2020 Update. Simply click on the right one and the download will begin.

Windows 10 May 2020 Update is a major feature update following the Service Pack-like release of version 1909 at the end of last year. Under the new leadership of Panos Panay, users are hoping that this new version will usher us into an era of bug-free Windows 10 experience.

Downloading the latest version right away or would you rather wait for the first lot to get it and report its stability before diving in? Let us know!

iso download link for 1803 latest.

Right click the MediaCreationTool.exe file then click Run as administrator.

Note: How to Verify If You Downloaded or Installed the Latest Version Windows 10.

Accept the End User License Agreement:

Select the option Create installation media for another PC if you want to download a ISO image or create a bootable DVD or USB thumb drive,

If you want to download a particular edition or both architectures, uncheck the Use the recommended option for this PC. Image.

Click in the Edition list box, choose your edition then click Next.

Windows 10 - contains Windows 10 Home and Windows 10 Pro. Windows 10 Home Single Language - only select this edition if you are running Windows 10 Single Language, Windows 8 Single Language or Windows 8.1 with Bing. Windows 10 N - only select this edition if you reside in Europe, it does not contain Windows Media Player. It contains Windows 10 Home N, Windows 10 Pro N. Please read the following: Fix Windows 10 Media Creation Tool from Defaulting to Home Instead of Pro.

Downloading the ISO file.

An ISO file is a digital or virtual replica of a physical disc. In order to use an ISO you must burn it to a optical disc. In the case of Windows 10, a blank Dual Layer DVD or an empty USB thumb drive. If you are using Windows 7, you can create the .ISO then burn it using the built in Disc Image utility. If you are running Windows XP or Windows Vista, you can using a third party burning tool such as ImgBurn or Roxio/Nero.

The launch of the flagship smartphone Honor V40 is just around the corner. In this regard, more and more details about the upcoming device appear on the Web. Reputable Chinese tech blog Digital Chat Station reported today that Honor V40 will boast the highest polling rate for a touchscreen on the market.

The published image shows a comparison of the touchscreen with a polling rate of 180 Hz and the touchscreen of the Honor V40. In addition, the source reports that the upcoming flagship Honor will surpass such advanced gaming smartphones as ASUS ROG Phone 3 and Xiaomi Black Shark 3, which boast OLED panels with a sampling rate of 270 Hz.

In addition, today's leak reports that the device will boast a high maximum screen brightness and excellent readability in direct sunlight. Recall that, according to earlier leaks, the Honor V40 will receive a powerful MediaTek Dimensity 1000+ chipset with an integrated 5G modem and support for 40W wireless charging.

Your best bet is to wait for an Official Response from Microsoft. As you know, there are a lot of "Speculations" on the net right now. But NO official Response or Notice from Microsoft themselves.

I Hope This Helps.

With all due respect to you, if you're unable to use a search engine to find the download website, are you sure you're ready to install the upgrade right now?

The conventional wisdom has always been to not jump on a major upgrade as soon as it's released. Let the early adopters and corporate testers

discover the problems that the upgrade can cause, and let Microsoft have some time to fix them. Nothing made by human beings is perfect, and with something as complex as an upgrade to Windows, you can practically bet the farm that something(s) will go wrong.

Moreover, with Windows 10 Microsoft is managing the upgrade process much better than with earlier versions of Windows. Microsoft sends out upgrades in waves, then waits for telemetry ('feedback') from upgraded devices to learn how well (or poorly) the upgrade is working out. Microsoft can fix problems (or try to) in successive waves, and even avoid sending the upgrade to certain devices if the telemetry identifies configurations that fail when the upgrade is applied. It takes several months to upgrade all Windows 10 devices.

If you have the Professional version of Windows and, like me, you don't want your computer to be included in those early waves, you can delay receiving the upgrade for a time that you chose. For me that's 90 days, so I won't even be a candidate for upgrading until that time has passed.

I think the wisest course is to wait until the upgrade comes to you. I'll use my 90+ days to learn about the upgrade - its new and improved features, bug fixes and security upgrades - and to get tips from the experience of the earlier adopters. By the time the upgrade finally shows up at my modem, I'll be ready .

I admit that my approach is not as exciting as getting the upgrade on the first day. On the other hand, I don't have any of the problems people rage over in this forum, when they complain how Microsoft 'destroyed' their computer, how about a class action lawsuit, etc. etc.

Does Anyone Have Windows 10 1803 Pro ISO?

Hi, I am Van. I'm an Independent Advisor and a Microsoft user like you. I'll be glad to help you today.

Have you tried using Rufus to download the ISO? If not, you can try downloading the ISO directly from the app. Please follow the steps below.

1. Download and run Rufus from this website <https://rufus.ie/> 2. In the Rufus app click the dropdown button at the right side of SELECT. Then choose DOWNLOAD 3. Click DOWNLOAD. Then follow the onscreen instruction to download your ISO 4. On the last part of where do want to download the ISO, you can check the download using a browser. Then click download to start downloading the file.

Please let me know if have any further questions. I will be glad to help.

Best regards, Van.
