HP DeskJet 2622 Driver.

Want to keep using your HP DeskJet 2622 on Windows 10? VueScan is here to help!

We reverse engineered the HP DeskJet 2622 driver and included it in VueScan so you can keep using your old scanner.

Here's what some of our customers are saying.

Read more reviews here.

Canon CanoScan LiDE 100 – wouldn't work under Windows 7, wouldn't work under Linux Mint, VueScan definitely gave it a second life. VueScan works like a charm under Linux Mint, and even fixed a critical issue with the user rights. Money well spent. See review on Facebook.

Victor C Glanville.

Hamrick Software - I have been using VueScan for 10 years on several different computers using 3 scanner models. It really is an excellent product well maintained and exceptional value for money. It has given me a lot of pleasure over the years and helped produce some high quality scans of vintage family photography. I can recommend it to anyone. See review on Facebook.

I am absolutely in love with this software! My Nikon COOL SCAN V would only work with Windows 98 so it's been our of commission for

quite a while. Thanks to VueScan, it back online and working better than ever. It is so efficient and easy to use that I'm looking forward to scanning several thousand slides that have been stored away and unusable. My scanner now works so much better than it did originally that I am incredulous. I purchased the Pro version and it is worth every penny of the reasonable price. WOW! Love it! Thank You Hamrick. See review on Facebook.

It works plain and simple! See review on Facebook.

In Jan 2003 I bought VueScan for my Epson Perfection 1200. I used it a lot, more functions than the standard driver. Got new computers with new operating systems, forgot about VueScan. I got a new Epson scanner - old one doesn't have Win10 drivers. I remembered VueScan. Found it, downloaded the trial version, and my old EPSON 1200 scanner WORKED again. Wow, a purchase made in 2003, works on a PC with an operating system that doesn't exist in 2003. 17 YEARS later! And that for a very small amount of money. THIS IS SERVICE AND ADDING VALUE TO YOUR CUSTOMER! See review on Facebook.

I had tons of photos to scan, and after doing some research I decided to go for VueScan. I don't regret my decision. Scanning was a breeze and saved me a lot of time. I'm using a Brother All-in scanner which I bought 3 years ago and whilst its scanning software is not bad it's much slower and has way less options than VueScan. My operation system is Windows 10. I can recommend VueScan without hesitation. It's worth the money. See review on Facebook.

Win10 doesn't support my older Fujitsu scansnap. But, with VueScan I can keep using it - so far, so good. See review on Facebook.

Louise Adams Quidort.

VueScan allowed me to still use my ScanSnap S1500M. Saved me from buying a new document scanner. Thanks. See review on Facebook.

Far better control of Nikon scanners than Nikon's own software. And does a great job with Kodachrome slides. See review on Facebook.

It's absurd that I couldn't use my Epson WF-3520 scanner when Mac OS updated, and Epson obviously has no interest in fixing the problem. Works perfectly with VueScan 9. See review on Facebook.

Was going to send my very old HP scanjet to the landfill but thanks to Hamrick Software I won't have to. Very sustainable. It works on my Macbook with Catalina OS. See review on Facebook.

Vuescan Professional saved me from having to buy a new scanner when Mac Catalina no longer supported my current scanner. Much less expensive than buying a new scanner, easy to use and great quality. See review on Facebook.

Rescued my Canon P-215 from the junk heap. Kept postponing updating my MacBook Air to High Sierra just to keep the Canon driver working. For some reason the driver and proprietary software stopped working today anyway. Thanks to VueScan, I get to use my scanner despite the fact that there's no longer support from Canon. Thank you! See review on Facebook.

I have 3 scanners in perfect condition, each no longer supported by their respective manufacturers, and no longer recognized by the latest version of MacOS. It was only after I purchased a new, supported and recognized scanner (big mistake) that I discovered VueScan. The product instantly identified the id, connected scanners, and brought them back to life. The new scanner is now sitting around collecting dust. An absolutely magnificent product. Highly recommended. See review on Facebook.

This software is great! We LOVE our ScanSnap S1500M and were so disappointed when it stopped working after the upgrade to macOS Catalina. We are so happy to have VueScan solve this issue for us. We are able to continue using our ScanSnap without having to shop for a new scanner. Installation and payment were easy and the VueScan software works wonderfully. Highly recommend! See review on Facebook.

I'm very pleased with the software. It recognized all scanner features and allows me to continue scan to documents after macOS update. See review on Facebook.

Truly the best scanning App for Mac! See review on Facebook.

Louise Adams Quidort.

VueScan allowed me to still use my ScanSnap S1500M. Saved me from buying a new document scanner. Thanks. See review on Facebook.

Easy to use and saved buying a new scanner when Mac OS changed to Catalina See review on Facebook.

Super nice scanning software, saved me from buying a new scanner. Fujitsu refuses to support my old - still perfectly working - scanner on Mac OS Catalina, but VueScan brought it back to life. It even offers more settings and is much faster than the original software. Thank you so much, Hamrick Software, you made my day! See review on Facebook.

I lost my installation CD. How do I install my HP printer or All in One?

Thanks for stopping by the HP community. A very good day to you. I reviewed the post regarding issues with installing the printer as you don't have the printer's CD. I will be delighted to assist you here.

Superb description and stupendous diagnosis of the issue before posting. Kudos to you for that. □

For better clarity and to assist you better I would require more information regarding this:

Did you try to download it from the HP support site? Is it a USB or a wireless connection? Is the operating system windows or Mac? What version of the operating system is associated with the computer?

For now, try these steps:

If the OS is Windows, then uninstall the printer software and reinstall it by following these steps:

In Windows, search for and open Programs and Features. Select your HP printer. Select Uninstall. In Windows, search for and open Devices and Printers. In the Devices and Printers window look for your HP Printer . If you see it listed, right-click on it and choose " Delete" or "Remove Device ." Open up the run command with the " Windows Key + R" key combo. Type printui.exe /s and click OK. Click on Drivers tab. Look for HP Printer drive r. If you see it click on it and click Remove at the bottom. Select OK. Remove all instances of the same. Select Apply and OK on the Print Server Properties windows. Close Devices and Printers. Restart the PC again.

Then download the latest full feature driver from <http://hp.care/2nzBGGW> and install it on the computer after selecting the correct operating system

Connect the printer to your computer only when the setup prompts for the printer.

This should fix it for you.

If this does not do the trick, please download the Windows Built-in drivers by following instructions from this link: <http://hp.care/2o3acvH>.

Now check if the issue gets fixed. It should get resolved.

Hope this helps. Let me know how this goes. I genuinely hope the issue gets resolved without hassles and the unit works great.

To simply say thanks , please click the "Thumbs Up " button to give me a Kudos to appreciate my efforts to help. If this helps, please mark this as " Accepted Solution " as it will help several others with the same issue to get it resolved without hassles.
