Create powerful learning interactions in minutes without additional coding.

[v18.2] Lectora Inspire – Best way to create interactive and responsive courses.

Lectora Inspire is a feature-rich and must-have teaching materials designing software (in short, it is a courseware creator) for teachers to prepare lessons. Its functions are much richer than the commonly used Microsoft PowerPoint or any other similar tools. Teachers can use Lectora Inspire to quickly and easily create and publish powerful and professional e-Learning contents.

As the world's most innovative electronic educating & learning tool, Lectora Inspire is by far also the most powerful (with hundreds of functional integration in the humanization of the UI) and pretty easy-to-use e-Learning program tool that represents a substantive leap of all courseware producing software. It supports HTML5, SCORM and AICC standards, makes it much easier for teachers to record and track the learning progress of students, allows to directly import the PPT with no need of adding plugins, and supports various mobile devices. Moreover, Lectora Inspire also contains multiple fully functional auxiliary tools, such as: Flypaper, Camtasia Studio, Snagit, etc.

Lectora Inspire uses the Microsoft Word style of UI, which allows users to better make courseware. The completed courseware can be output directly and distributed onto a variety of mobile devices, and support automatic conversions between different file formats. In a word, Lectora Inspire is a perfect choice for teachers, because it can undoubtedly save you a lot of development time spent on the interactive and responsive courses.

// Key Features //

Quickly and easily create mobile courses Design once. Distribute everywhere Adjust mobile views to perfect your course Convert existing courses to RCD.

// System Requirements //

Microsoft .NET Framework 4.0+

// Edition Statement //

AppNee provides the Lectora Inspire multilingual full installers and unlocked files or unlock patch for Windows 32-bit & 64-bit.

// Installation Notes //

for v18.0.2+:

Download and install Lectora Inspire as trial Copy the unlock patch to installation folder and apply (click the left leopard head) Done.

for v17.1.3:

Download and install Lectora Inspire Copy the unlocked files to installation folder and overwrite Done.

// Prompts //

Lectora Inspire installs TechSmith's Snagit and Camtasia by default.

// Warning //

The unlock patch might be reported as FileRepMalware threat with high risk. Use VirusTotal to make a full, authoritative scan, and decide to use it or not by yourself.

*** Please remember: antivirus software is not always right, just be careful and use it at your own risk.

If some download link is missing, and you do need it, just please send an email (along with post link and missing link) to remind us to reupload the missing file for you. And, give us some time to respond. If there is a password for an archive, it should be "appnee.com". Most of the reserved downloads (including the 32-bit version) can be requested to reupload via email.

Search.

Short Notice.

About Missing Links Please feedback any invalid download links you met at AppNee via E-mail, must including post URL and missing file link(s). Then we will try to fix all mentioned links ASAP (that usually takes 7+ days). For now we won't remind you by replying your email as before. Instead, please make a check by yourself then. INFO 1) To finish AppNee's original mission, we still have 3500+ applications to share. And in AppNee's current running mode, this would take 13 years at least. But it is likely that AppNee will make an evolution in a few years. Then AppNee will slow down a lot or be archived with unscheduled maintenance only. 2) Due to job changes, we cannot reply most emails (and emails with content like copyright complaints, threats, extortion will be automatically filtered out via keywords by our local email client). 3) New 3rd-party free file hostings use plan! 4) To see whether some software has been shared by AppNee, use this template. WARNING More and more top-level domain names with word "appnee" are being snapped up by domain speculators. We are dismissive of this and warn these human trash: trying to trick visitors with AppNee's reputation won't work. So please note two points: 1) Now, AppNee merely uses one top-level domain name (appnee.com), all others such as appnee.net, appnee.us are fake; 2) In the future, we will tell everyone our new domain before stop using appnee.com, via email only. So, please do not ask us questions like "Is appnee.net, appnee.us, or remnantnh.com yours?". The answer is always the same "We have only one site, and it's appnee.com now." With IP from countries such as Italy, German and USA increasingly copying and misappropriating AppNee's content and server resources, finally we decided that from October 26 these countries would be forced to conduct behavior detection. And if necessary, we have to block them from accessing all of our websites. This action will take 6 months at least!

Hot Tags.

0) Free.AppNee.com is going to be integrated into AppNee some days later. Then Free.AppNee.com will be removed totally.

1) Starting from 2021.02.16, there will be no new software added to appnee.com with a fixed period. This situation can last from a few months to two years.

2) For software that has been released, except for critical software, the update frequency will be reduced to vX.X or vX (e.g.: v1.1 to v1.2, or v1 to v2).

3) Given that people in some countries are embezzling, selling, and abusing the free resources that AppNee releases, it's possible that AppNee will enable its user registration function. As a result, any unregistered user will no longer be able to access any resources published on AppNee.

Lectora Inspire 12 Full Version.

BAGAS31.com – Presentasi merupakan aktivitas penting yang tidak dapat dihindari di era digital saat ini. Jika biasanya kamu membuat slide presentasi dengan Microsoft Power Point, kali ini kami akan memberikan sebuah pilihan bagus yang mungkin patut kamu coba. Lectora Publisher.

Create and publish content quickly, easily and independently with this advanced authoring tool that comes with an extensive list of functions.

Lectora Publisher is a comprehensive and reliable software solution whose main purpose is to help users create e-Learning presentations, tests and quizzes stocked with various question types and styles.

Because of the intuitive interface that the utility comes with, you don't have to spend a lot of time learning how to use Lectora Publisher. It also provides you with a design wizard that enables you to choose your size, style and theme in order to create a great-looking course.

Before working at your project, the application requires you to create a new title or simply open an existing one and since it comes with an intuitive title wizard, you are guided through all the steps. Previews of the first page are displayed on the right corner of the window so you can access the style that meets your needs.

What's more, Lectora Publisher relies on two basic concepts namely book metaphor and inheritance, that novice users should learn before creating their presentations. The first concept helps you create an organized hierarchy of content, while the second concept is a time-saving feature that helps you insert objects automatically on several pages.

The menus are well-organized and allow you to access various buttons and options so you can customize your presentations. You have the possibility to insert new text, images, videos, survey questions and documents.

The left panel displays a hierarchy of all the elements inserted into the presentation and enables you to customize each object you want.

By using the 'Import' option you don't have to start your presentation from scratch. Simply import your PPT or CSV content right into the application and make it interactive and engaging for your learners with animations.

After you finished the presentation, you are able to publish it to HTML or to a single file executable. Then, the utility checks your project for errors and warnings and easily shares your content on popular social media platforms including Facebook or Twitter.

To wrap it up, Lectora Publisher proves to be an effective solution when it comes to designing online courses, presentations and tests.
