Despite how old it gets, Nero Burning ROM still comes along with the best technology to burn optical discs. Without a doubt, the best option at anyone's reach to make backups of our information and provide it with the format of our choice: music, data, video. all the latter, with top security and stability functions, providing us with full and customized control over the entire recording project.

The best program to burn CDs, DVDs, and Blu-rays.

The features and functions of Nero Burning ROM 2021 make it the most reliable program to burn optical discs:

Music ripper : you can extract songs from your audio CDs and convert them to the format required, such as MP3, MP3 PRO, AAC, FLAC or APE, including all the file's metadata. Copy from disc to disc : this function allows us to make exact copies of our discs, whether in multimedia or data format. Create your own discs : it's the main features of this tool. It allows us to create discs however we want with photos, videos or any other information, supporting different formats including ISO images. Furthermore, it comes along with the Nero CoverDesigner functions with which we can create artwork for our discs. Anti-copy protection : it offers us SecurDisc technology to avoid unauthorized copies of information contained on a disc. The latter allows us to protect our data with 256-bit encryption, digital signatures, and passwords. Longer life and readability :

Nero guarantees that even scratched discs can be played thanks to adjustable redundancy techniques. Customization and flexibility : Nero Burning ROM adapts to the way we work. Don't need that function or don't usually use that other one? No problem, we can configure the toolbar however we like and change the different hotkeys. Gracenote : it comes along with standard technology for music recognition and related data.

How to burn a disc with Nero Burning ROM?

Despite the software's wide range of features and functions, it's still a really easy-to-use program to burn discs and make backups , allowing us to create copies in just a few steps. Three to be more precise:

Step 1 : go to the New Compilation window, choose the type of disc and the format. Step 2 : from the selection screen, indicate the number of discs to be recorded. Step 3 : finally, start the burning process.

Don't think twice: if you need a program to create discs with any sort of contents, whether backups or compilations of different data, Burning ROM by Nero is the best solution for you.

Nero 9 Free.

Nero 9 Free is a multimedia suite that is capable of creating and writing on DVD and CD optical discs, assuming the the PC is equipped with a CD or DVD burner. It does not support Blu-Ray discs.

The speed of writing discs with Nero 9 Free depends on the capabilities of the optical drive. Older drivers tend to be slower than newer.

There are really a lot of free CD burning applications available now (just check our freeware category for CD/DVD burners), yet some people still prefer the older outdated Nero 9 Free, the last freeware version of the Nero suite.

Nero has long been a leader in CD burning application software and users with older hardware can welcome this ad-supported version. It is basically a stripped down version of the popular Nero Burning ROM. Unfortunately with this version, it supports only CD and DVD discs and cannot burn DVD movies. Though it is able to create DVD clones.

Compared to DeepBurner or ImgBurn, Nero 9 Free has virtually no special features. Additionally, Nero 9 Free does NOT support Blu-ray disc burning and therefore unsuitable for many modern setups.
