Windows 10 Canon MX850 Printer.

Hi - I'm trying to find a driver for a Canon MX850 Printer for Windows 10(64).

The Canon website doesnt have a driver specific for it.

Can anyone help?

Thank you for posting your query in Microsoft Community.

As the drivers are not available for Windows 10, I suggest you to try installing old drivers in compatibility mode. Compatibility mode runs the program using settings from a previous version of Windows. Follow these steps to install the drivers in compatibility mode and check if that helps.

Download the drivers from the manufacturer's website.

Right-click on the driver setup file and click on ' Properties' .

Click on the ' Compatibility' tab and check the box ' Run this program in compatibility mode for' and select Windows 8/8.1 operating system from the drop down menu and proceed with the installation. Once this is done, restart the computer and check if the issue persists.
