If you are a Minecraft player, you already know the game offers almost infinite possibilities. When it comes to creativity: there are only a few limits you will find for creating what you want. All these possibilities become even more evident with the installation of MODs.

A MOD to automate tasks in Minecraft.

BuildCraft is a MOD to extend different functions in the game through the use of tools and machines . Using pipes, you will be able to install a complete transport system to transport liquids and other materials. This way you will be able to use:

Mining machines, fluid pumps, refineries, and tanks. Engines. Material transport systems. Pipes of different materials.

And remember that you need to provide energy to the engines to make them work!

To be able to install any of these MODs, you will need to have a copy of the game (obviously), as well as Java and the Forge client installed on the computer.

Advanced Mortars Mod 1.12.2.

Advanced Mortars Mod 1.12.2 is a Minecraft processing mod for modpack creators. It brings you four mortars that come with configurable durability.

If you are a modpack maker, then you should install the above mod. It brings you some example recipes that are useful to follow. Besides, you can also use it with CraftTweaker. The mod supports the JEI integration as well. However, the transfer functionality for items has been excluded intentionally. Here is how you use the mod:

To insert a mortar, you right-click the mortar to put 8 stacks of items in it as you hold the items. Then, you right-click or hold down the right mouse with a free hand to start crafting. You have to sneak and right-click the mortar with a free hand to get the items in the mortar back. When you sneak and left-click the mortar, you can pick it up. The contents inside the mortar will be kept when you pick it up in that way. Every mortar has a different recipe.

The mortars are also necessary items to have in the game. So, if you want to use the new ones, then start installing Advanced Mortars . The mod also needs Minecraft Forge installation.
