As the lead singer of the Animals, Eric Burdon was one of the British Invasion's most distinctive vocalists, with a searingly powerful blues-rock voice. When the first lineup of the group fell apart in 1966, Burdon kept the Animals' name going with various players for a few years. Usually billed as Eric Burdon & the Animals, the group was essentially Burdon's vehicle, which he used to purvey a far more psychedelic and less R&B-oriented vision. [Read More.](#)

Classic Rock 1/14.

Classic Rock stands for a popular variety of rock music in the late 1960s. In contrast to the soul-related R&B style, it was dominated by bands from England such as Jethro Tull, The Rolling Stones, The Animals, The Kinks, The Yardbirds and The Who. This style began with the Beatles, who gradually moved away from the simple song structures and harmonies of their early years, and together with other bands of their time, allowed rock to "grow up". Rock music is based on the instruments and sounds that were already available in the 60s, with electromechanical instruments such as electric guitars, but largely without purely electronic instruments. The sound should also be playable live, without studio tricks.
